QUESTION 1

Observe the details of the following dynamic inventory file. \$ ls -l dynamic.py -rw-rw-r--. 1 user user 1928 Mar 30 08:21 dynamic.py Why will this inventory file cause the ansible command to fail?

- A. Ansible cannot use python scripts as inventories.
- B. The ansible user must own the file.
- C. The file is not executable.
- D. The ansible command will not fail using the noted file with the given details.

Correct Answer: C

Without being executable. Ansible will attempt to parse the script as a static inventory and fail.

QUESTION 2

How are facts collected? (Choose all that apply.)

- A. During playbook execution.
- B. Ansible agents push facts to the control node.
- C. The Ansible control node periodically polls the hosts in the inventory.
- D. The setup module.

Correct Answer: AD

The setup module collects facts.

QUESTION 3

State whether the following statement is true or false.

The command `ansible-galaxy init` won't create the file structure you need for roles.

- A. True
- B. False

Correct Answer: B

It will create the correct structure for you.

Correct Answer: B

QUESTION 5

Correct Answer:

See the for complete Solution below. Solution as:

```
- name: webdev
  hosts: dev
  tasks:
    - name: create webdev user
      user:
        name: webdev
        state: present
    - name: create a directory
      file:
        mode: '2755'
        path: /webdev
        state: directory
    - name: create symbolic link
      file:
        src: /webdev
        path: /var/www/html/webdev
        state: link
    - name: create index.html
      copy:
        content: Development
        dest: /webdev/index.html
```

```
        dest: /webdev/index.html
    - name: Install selinux policies
      yum:
        name: python3-policycoreutils
        state: present
    - name: allow httpd from this directory
      selcontext:
        target: '/webdev/.*)?'
        setype: httpd_sys_content_t
        state: present
    - name: restore the context
      shell: restorecon -vR /webdev
```
