### QUESTION 1

Ursa Major Solar would like its authenticated external users to be able to search for Quote and Contract objects but not Opportunity or Asset objects.

Which two standard features allow an administrator to accomplish that?

Choose 2 answers

- A. Remove Opportunity and Asset from the Title Menu component in the property editor.
- B. Remove Opportunity and Asset from the navigation Menu component in the property editor.
- C. Remove Opportunity and Asset from the object list in the Global Search Result component property editor.
- D. Remove Opportunity and Asset from the Autocomplete object list in the Search component property editor.

Correct Answer: CD

To prevent authenticated external users from searching for Quote and Contract objects but not Opportunity or Asset objects, you need to remove Opportunity and Asset from the object list in the Global Search Result component property editor and the Autocomplete object list in the Search component property editor. The Global Search Result component displays the search results for all objects that match the search term. The Autocomplete object list displays the suggested objects that match the search term as you type. You can customize these components by selecting or deselecting the objects that you want to include or exclude from the search.

### QUESTION 2

DreamHouse Realty (DR) recently created a site for potential buyers. DR has a rich knowledge base organized in data categories and now plans to make those Knowledge articles available to site users.

Which two steps does DR need to take in order to ensure that new articles show up in the site on an ongoing basis without manual intervention?

Choose 2 answers

- A. Map articles to Content Topics.
- B. Map topics to data categories.
- C. Enable "Share on Sites" setting.
- D. Enable "Automate Topic Assignment" setting.

Correct Answer: BC

To make Knowledge articles available to site users, you need to map topics to data categories and enable the "Share on Sites" setting. Topics are labels that you can assign to articles to make them easier to find and organize. Data categories are a way of classifying articles based on a predefined hierarchy. You can map topics to data categories, so that when you assign a topic to an article, it automatically inherits the data category visibility settings. The "Share on Sites" setting allows you to share articles with public users on your site.

### QUESTION 3

Cloud Kicks has noticed its new Experience Cloud site is taking a long time to load. Which tool should the system administrator use to troubleshoot the problem?

- A. Salesforce Community Page Optimizer
- B. Lightning Page Maximizer
- C. Experience Cloud Performance Profiler
- D. Cloud Network Optimization Bolt

Correct Answer: A

To troubleshoot the problem of the site taking a long time to load, the system administrator should use Salesforce Community Page Optimizer. This is a tool that analyzes the performance of an Experience Cloud site and provides recommendations for improving the page load time. The tool checks for issues such as component density, image size, caching settings, and network latency.

### QUESTION 4

Ursa Major Solar is utilizing audience targeting for specific components in its portal.

Which two considerations regarding audience targeting are true? Calculator

Choose 2 answers

- A. You can't assign audiences to the components in the template header and footer sections.
- B. Available domains are created in the Administration workspace and associated with a community through a custom URL.
- C. You can't assign record-based criteria to a component or branding set.
- D. You can only have three audiences.

Correct Answer: AC

Audience targeting allows you to display different content to different audiences based on criteria such as profile, location, domain, or user. However, there are some limitations of audience targeting, such as:

You can't assign audiences to the components in the template header and footer sections. These sections are shared across all pages in your site and can't be customized for different audiences.

You can't assign record-based criteria to a component or branding set. Record-based criteria are only available for page variations and navigation menu items.

---

### QUESTION 5

Universal Containers (UC) maintains multiple customer experiences, but only one profile for No customer has access to more than one experience Which two steps should the UC admin take to grant access to each customer? Choose 2 answers

- A. Create a permission Set
- B. Select a permission pot for a given experience
- C. Select the profile for a given experience
- D. Edit the applicable user profile

Correct Answer: BC

Two steps that the UC admin should take to grant access to each customer are B and C. To grant access to an Experience Cloud site, you need to assign a license type, a profile, and a permission set to each user. A license type determines what features and functionality a user can access on the site. A profile determines what objects and fields a user can see and edit on the site. A permission set determines what additional permissions and settings a user can have on the site. To assign a profile and a permission set for a given experience, you need to select them from the drop-down menus in the Admin Workspace of your Experience Builder tool.
