QUESTION 1

Which of the following are used by FireWire 800 devices?

- A. 6-pin connectors
- B. 10-pin connectors
- C. 9-pin connectors
- D. 4-pin connectors

Correct Answer: C

FireWire 800 devices use 9-pin connectors at both ends of the cable. FireWire 400 devices can also be connected to the FireWire 800 ports and vice versa by using an appropriate adapter cable.

What are FireWire ports? Hide

FireWire ports are found on high-end computers and many new media centers. They are also called IEEE 1394 ports.

FireWire ports transfer data at a rate of 400 Mbps or 800 Mbps. They are used primarily for video transfer from digital movie cameras.

Answer options D and A are incorrect. FireWire 400 devices use 4-pin or 6-pin connectors. Reference: "<http://en.wikipedia.org/wiki/FireWire> "

QUESTION 2

Which of the following video connections provides the highest resolution?

- A. USB
- B. S-video
- C. HDMI
- D. VGA

Correct Answer: C

QUESTION 3

A user, Joe, wants to install an application on his computer.

Which of the following factors should he be aware of before beginning?

- A. The computer has the proper hard drive drivers installed.
- B. The computer is connected to a secure wireless network.

- C. Check for any updates for the application.
- D. The computer meets the application's minimum requirements.

Correct Answer: D

QUESTION 4

You are responsible for purchasing computer hardware for a school district. You have been looking at various sales brochures advocating various types of memory.

What would be one advantage to buying dual-channel memory?

- A. It will reduce memory bottlenecks.
- B. It will be twice as fast as single channel memory.
- C. It has no advantage over single channel memory.
- D. It will have more memory capacity than single channel memory.

Correct Answer: A

Dual Channel memory offers two channels for data to move through it. This may reduce bottle necks.

Answer options B and D are correct. The dual or single channel issue is unrelated to memory speed or capacity.

Answer option C is incorrect. It will have an advantage over single channel, though the advantages are slight.

QUESTION 5

After initial OS and application installation on a laptop, an application warns that it will only work 24 more times.

Which of the following should be done NEXT?

- A. The application has to be registered to the user.
- B. The application must be upgraded to a 64-bit version.
- C. The application must be activated.
- D. The application needs to be reinstalled.

Correct Answer: C
