QUESTION 1

In 1755 British writer Samuel Johnson published an acerbic letter to Lord Chesterfield rebuking his patron for neglect and declining further support. Johnson's rejection of his patron's belated assistance has often been identified as a key moment in the history of publishing, marking the end of the culture of patronage. However, patronage had been in decline for 50 years, yet would survive, in attenuated form, for another 50. Indeed, Johnson was in 1762 awarded a pension by the Crown--a subtle form of sponsorship, tantamount to state patronage. The importance of Johnson's letter is not so much historical as emotional: it would become a touchstone for all who repudiated patrons and for all who embraced the laws of the marketplace.

The author of the passage mentions Johnson's 1762 pension award in order to

- A. provide a specific example of patronage's surviving into the second half of (he eighteenth century
- B. emphasize that patronage still helped support Johnson's writing after his letter to Chesterfield
- C. provide evidence for a general trend in the later half of the
- D. eighteenth century of private patronage's being replaced by state sponsorship

Correct Answer: B

QUESTION 2

Some archaeologists speculate that the Americas might have been initially colonized between 40,000 and 25,000 years ago. However, to support this theory it is necessary to explain the absence of generally accepted habitation sites for that time interval in what is now the United States. Australia, which has a smaller land area than the United States, has many such sites, supporting the generally accepted claim that the continent was colonized by humans at least 40,000 years ago. Australia is less densely populated (resulting in lower chances of discovering sites) and with its overall greater aridity would have presented conditions less favorable for hunter-gatherer occupation. Proportionally, at least as much land area has been lost from the coastal regions of Australia because of postglacial sea-level rise as in the United States, so any coastal archaeological record in Australia should have been depleted about as much as a coastal record in the United States. Since there are so many resource-rich rivers leading inland from the United States coastline, it seems implausible that a growing population of humans would have confined itself to coasts for thousands of years. If inhabitants were present 25,000 years ago, the chances of their appearing in the archaeological record would seem to be greater than for Australia.

The passage is primarily concerned with doing which of the following?
