QUESTION 1

The following is true about the AP installation location?

- A. For aesthetic needs, priority can be given to placing the AP on the ceiling.
- B. If the site is a monolithic ceiling, the AP should be considered as close to the maintenance port.
- C. The material of the ceiling is generally thin, and the impact on the cover is negligible.
- D. When wall-mounting or installing under the ceiling, it may be necessary to punch holes.
- E. When surveying, try to confirm with the property whether it is feasible.

Correct Answer: ABD

QUESTION 2

When WLAN design outdoor network regulations, it is necessary to consider the coverage according to the EIRP limit of each country. In the case of considering MIMO gain, the following Which option is the calculation method for EIRP?

- A. AP transmit power + antenna gain - feeder attenuation
- B. AP transmit power - antenna gain - feeder attenuation
- C. AP transmit power - MIMO gain + antenna gain - feeder attenuation
- D. AP transmit power + MIMO gain + antenna gain - feeder attenuation

Correct Answer: D

QUESTION 3

Which of the following options are part of the lifecycle phase of a WLAN project operation?

- A. Planning
- B. Deployment
- C. Upgrade
- D. Operation and maintenance
- E. Troubleshooting

Correct Answer: ABD

QUESTION 4

Which of the following APs supports MIMO 3*3 technology?

- A. AP6010DN
- B. AP5010DN
- C. AP6010SN
- D. AP7110DN

Correct Answer: D

QUESTION 5

In a school dormitory scenario, WLAN needs to be deployed. The customer proposes to maximize the bandwidth. Which of the following methods can best meet the needs of customers?

- A. AP6310SN power division scheme
- B. AP6310SN coupled solution
- C. AP9330DN room division program
- D. AD9430DN agile distributed solution

Correct Answer: D
