- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

#### QUESTION 1

What is the default priority of VRRP?

- A. 1
- B. 0
- C. 100
- D. 255

Correct Answer: C

---

#### QUESTION 2

Which of the following devices can be used as PDs?

- A. Wireless AP
- B. PoE switch
- C. AC6605
- D. VoIP phone

Correct Answer: AD

---

#### QUESTION 3

Without considering the MIMO gain, what is the correct description about EIRP?

- A. In wireless communication engineering, EIRP is commonly used to measure the strength of interference and the ability of the transmitter to transmit strong signals.
- B. The product of the power supplied by the EIRP to the antenna of the radio transmitter and the absolute gain of the antenna in a given direction
- C. EIRP represents the transmit power of the AP
- D.  $EIRP = P_{\text{transmit power}} - \text{Loss feeder loss} + G_{\text{antenna gain}}$

Correct Answer: ABD

---

#### QUESTION 4

The following is a statement about the combination of the WLAN room subsystem and the existing operator room system. What is wrong?

- A. The WLAN signal is not in the same frequency band as the GSM, CDMA, 3G and other signals, and the combiner has a high isolation, so the signal between different frequency bands No interference with each other
- B. Existing room division devices (power splitter/coupler/antenna) need to support the 2.4G frequency band of WLAN, otherwise the room division device needs to be replaced.
- C. If the operator's signal can meet the coverage requirements, it can usually be satisfied after accessing the WLAN signal.
- D. There must be a parallel topology relationship between the APs, and multiple APs are not allowed to be connected in series on one branch.

Correct Answer: C

---

#### QUESTION 5

Which of the following wireless applications has higher bandwidth and real-time requirements?

- A. Mobile office
- B. Wireless medical
- C. Rail transit
- D. Video return

Correct Answer: D
