QUESTION 1

Which statement is correct regarding load checks and fingerprint learning with UDP Flood defenses.

- A. UDP packet data segments are exactly the same content that can be used to check the load defense.
- B. Fingerprint learning is dynamically generated by cleaning equipment, the attack packets after learning some salient features of the fingerprint, fingerprint matching packets will be dropped.
- C. Load inspection checks all UDP packets of data.
- D. Load checks need to set the offset number of bytes, fingerprint learning does not need to set the offset number of bytes.

Correct Answer: D

QUESTION 2

To establish IPsec VPN Security, ACL rules should mirror each other. This is the general requirement at both ends in Huawei firewall environment.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 3

In L2TP over IPsec scenarios, The USG device will first use the original data packet that is encrypted using IPsec, and then encapsulates the data packets using L2TP.

- A. TRUE
- B. FALSE

Correct Answer: B

QUESTION 4

For a virtual service technology, which of the following statements is correct?

- A. For multiple real servers, real servers need to be in the same network and the same security zone
- B. For multiple real servers, real servers may not be in the same segment, but must be in the same security zone
- C. For multiple real servers, real servers may not be in the same security zone, but must be in the same segment
- D. For multiple real servers, network and security zone where the real server load balancing does not affect

Correct Answer: A

QUESTION 5

See the following firewall information:

```
display firewall session table verbose
http VPN:public --> public
Zone: trust--> untrust TTL: 00:00:10 Left: 00:00:04
Interface: GigabitEthernet0/0/2 NextHop: 192.168.10.4
MAC: 00-22-a1-00-11-ab
<--packets:8 bytes:1569 -->packets:10 bytes:4133
128.18.196.25:4552[192.168.10.5:2051]-->192.168.10.4:80
```

Based on the output, which of the following answers are correct? (Choose three answers)

- A. The first packet interface to enter this data stream from the Trust zone, issuing from the Untrust zone interfaces
- B. This data stream has been NATed
- C. NAT conversion technology is being used
- D. The virtual firewall feature is enabled firewall

Correct Answer: ABC
