QUESTION 1

RSTP provides different functions in different scenarios. Which of the following statements is false?

- A. After TC-BPDU attack defense function is enabled, you can set the number of times the switch processes TC BPDUs within a certain period
- B. The role of the designated port that is enabled with root protection cannot be changed
- C. If the edge port on the switch enabled with BPDU protection receives RST BPDU, the switch sets the edge port as a non-edge-port and triggers STP calculation
- D. When the designated port enabled with root protection receives optimal RST BPDUs, the port enters the Discarding state and does not forward packets. If the port does not receive optimal RST BPDUs within a certain period of time, the port will automatically restore to the Forwarding state

Correct Answer: C

QUESTION 2

After which of the following parameters are modified does an IS-IS neighbor relationship need to re-established?

- A. The cost of an IS-IS interface is changed.
- B. The IP address of an ISIS interface is changed.
- C. The level of an ISIS interface is changed.
- D. The interval at which an IS-IS interface sends IIH packets is changed.

Correct Answer: C

QUESTION 3

Which of the following statements regarding the stateful inspection firewall is true?

- A. When the stateful inspection firewall checks packets, packets of one same connection are not correlated.
- B. Because UDP is a connectionless protocol, so the stateful inspection firewall cannot match UDP packets with the status table.
- C. The stateful inspection firewall only needs to match the first data packet against a rule, and the subsequent packets of the connection are matched directly in the state table.
- D. The stateful inspection firewall needs to match the rules for each incoming packet.

Correct Answer: C

QUESTION 4

The filter-policy 2000 export command is run in an ISIS process. Which of the following statements about the functions of a filter policy is false?

- A. Is used together with the route import function to advertise some imported external routes to neighbors.
- B. If this command is not run, the device by default advertises all routes that ISIS Imports form external routing protocols.
- C. Controls the advertisement of routes generated by the device.
- D. Filters LSPs to be advertised.

Correct Answer: B

QUESTION 5

When two routers exchange LSDB information using DD packets, a master/slave relationship is formed first, the router with a larger router ID is the master, and determine the MS bit.

- A. TRUE
- B. FALSE

Correct Answer: B
