QUESTION 1

The following statement about the VPNv4 address is wrongly described as ?

- A. By default, PE does not perform VPN-target filtering on received VPNv4 routes.
- B. Local PE sets up An Export Target for these routes before releasing VPNv4 routes learned from sites that are directly connected to them to other PEEs attributes, and are published with routes as extended community attributes for BGP.
- C. Carries the RD attribute when BGP publishes both reachable and unreachable VPNv4 routes.
- D. The VPNv4 address has a total of 12 bytes, including an 8-byte route identifier RD (Route Distingulisher) and a 4-byte IPv4 Address prefix.

Correct Answer: A

QUESTION 2

View the IGMP configuration of the interface on the router RTA as follows, and the information about the operation of the RTA is incorrect

```
<RTA>display igmp interface
Interface information of VPN-Instance: public net
GigabitEthernet0/0/1(192.168.1.1):
  IGMP is enabled
  Current IGMP version is 2
  IGMP state: up
  IGMP group policy: none
  IGMP limit: -
  Value of query interval for IGMP (negotiated): -
  Value of query interval for IGMP (configured): 60 s
  Value of other querier timeout for IGMP: 0 s
  Value of maximum query response time for IGMP: 10 s
  Querier for IGMP: 192.168.1.1 (this router)
```

- A. The packet interval for a particular group query is 60 seconds
- B. The interface IP address is 1921681.1
- C. The maximum response time for query messages is 10 seconds
- D. The IGMP protocol version is 2

Correct Answer: A

QUESTION 3

Which of the following BGP attributes is not required in the Update message for a BGP route?

- A. WITH
- B. Local-Preference
- C. AS_PATH
- D. Origin

Correct Answer: AB

QUESTION 4

The authentication types of ISIS include interface authentication, zone authentication, and routed domain authentication

- A. True
- B. False

Correct Answer: A

QUESTION 5

The following statement about is the ISIS protocol LSP message is correct

- A. LSP fast diffusion feature, first diffuse less than the specified number of LSPs, to speed up the synchronization process of LSDB
- B. By configuring an LSP-generated smart timer, the timer automatically adjusts the delay time based on the frequency of changes in routing information
- C. When the link status information increases, the message length of the LSP can be increased so that each LSP can carry more information.
- D. Reducing the minimum time interval for sending LSPs per port can speed up the diffusion of LSPs.

Correct Answer: ABCD
