100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

#### QUESTION 1

Which of the following scenarios does virtualization apply to? [Multiple choice]

- A. A company has a total of ten business systems, and the host resource utilization of these services is less than 20%
- B. A scientific research institution uses a customized operating system to ensure the confidentiality of scientific research results
- C. An enterprise needs a high-load, intensive computing environment
- D. The daily use of desk applications by employees in a unit is highly similar

Correct Answer: ACD

---

#### QUESTION 2

In FusionCompute, the QoS parameters that can be set for the virtual machine do not include:

- A. GPU
- B. Disk IOPS
- C. Memory
- D. Network
- E. CPU

Correct Answer: A

---

#### QUESTION 3

In Huawei Fusion Compute, the following description of the number correspondence between virtual machines and DVS is correct (multiple selection)

- A. When a virtual machine has a network card, the network card can only be associated with one DVS
- B. When a virtual machine has multiple network cards, each network card can be associated with a DVS
- C. When there are multiple NICs in a virtual machine, multiple NICs can be associated with the same DVS.
- D. When a virtual machine has a network card, the network card can be associated with multiple DVSs.

Correct Answer: ABC

---

#### QUESTION 4

The following Qos description about CPU and memory resources is incorrect.

- A. Memory resources QoS is used to ensure that business-critical virtual machines can get sufficient memory resources
- B. CPU shares and CPU reservations work only when each virtual machine competes for computing resources
- C. The CPU QoS of the virtual machine is used to ensure that the computing resources of the virtual machine are reasonably allocated
- D. Memory resource QoS can only be used after the memory reuse switch is enabled

Correct Answer: D

---

#### QUESTION 5

ISCSI is a standardized protocol based on the \_\_\_\_\_ protocol and the SCSI instruction set. It is widely used in many storage networks using the \_\_\_\_\_ architecture.

- A. FC IP SAN
- B. TCP / IP FC SAN
- C. FC FC SAN
- D. TCP / IP IP SAN

Correct Answer: D
