QUESTION 1

If the internal link is faulty in an N8500 clustered NAS storage system, which of the following items can be skipped during troubleshooting?

A. The heartbeat network between engines

B. The network between an engine and a disk enclosure

C. The Fibre Channel network between an engine and a storage unit

D. The network between a storage unit controller enclosure and a storage unit disk enclosure

Correct Answer: B

QUESTION 2

Which of the following statements about the intelligent load balancing feature of the OceanStor 9000 are correct? (Select three.)

A. Performance is balanced among all nodes. Capacity cannot be balanced among all nodes.

B. Nodes can be divided into zones. An independent load balancing policy and an independent domain name can be configured for each zone.

C. Load balancing policies can be based on CPU usage, memory usage, bandwidth usage, number of network connections, and/or node capability.

D. The OceanStor 9000 provides the load balancing service based on round robin, CPU usage, or the number of connections to a node.

Correct Answer: BCD

QUESTION 3

Which of the following statements about the InfoQuota feature of the OceanStor 9000 are correct? (Select three.)

A. Quotas can be set based on users.

B. Quotas can be set based on user groups.

C. Quotas can be set for file directories.

D. Quotas can be set for files.

Correct Answer: ABC

QUESTION 4

In an OceanStor 9000 storage system, the management IP address is 100.16.100.3, the front-end service network segment is from 192.168.100.1 to 192.168.100.20, the dir00l directory is shared, and the share path is /dir00l. Which of the following statements about the share access are correct? (Select two)

A. The clients that attempt to access the share must interwork with IP address 100.16.100.3.

B. The clients that attempt to access the share must interwork with any IP address in the network segment from 192.168.100.1 to 192.168.100.20.

C. If the client runs the 5U5E operating system, use the mount -t nfs ipaddress:\dir001 \mnt command to mount the share.

D. If the client runs the SUSE operating system, use the mount -t nfs ipaddress:/dir001 /mnt command to mount the share.

Correct Answer: BD

QUESTION 5

In Huawei OceanStor 9000, which authentication mode is not supported by NFS sharing?

A. NIS authentication

B. LDAP authentication

C. Client IP address/host name authentication

D. AD authentication

Correct Answer: D
