

# H13-629<sup>Q&As</sup>

HCIE-Storage V2.5

## Pass Huawei H13-629 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.passapply.com/h13-629.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Which of the following are correct regarding the Huawei OceanStor 9000 V100R001C30 products for video monitoring services? (multiple choice)

- A. To improve the reliability of the video data storage device, the user turns on the securevideo feature of the data disk using a 4 + 1 protection level
- B. The user turns on the securevideo feature, with two data corruptions if the data disk uses a 4 + 1 protection level and only 3 for a write operation
- C. Users open the securevideo feature data consistency scanning, the system does not complete the data files, will be cleaned up
- D. After the user turns on the securevideo feature, the file corruption event has been reported while reading and writing files, and the data recovery failure alarm is no longer reported

Correct Answer: AD

---

### QUESTION 2

For SQL Server 2005 and 2008, user can connect to the database engine of a specified server through the SQL Server Management Studio tool. Which kind of connection authentication requires the user ID and password for login while connecting the database through the client application?

- A. SQL Server Authentication
- B. Windows authentication
- C. When login as a super user
- D. Others

Correct Answer: A

---

### QUESTION 3

The peak write bandwidth for an application is 10MB / S, with an average write latency of 200KB / s and an average write IO size of 4KB (bandwidth utilization of 70%). If you need to use OceanStor V3 storage array to implement data disaster recovery and set it as asynchronous replication mode, you need the minimum network-wide bandwidth of which of the following?

- A. 3.2Mbps
- B. 128Mbps
- C. 114 Mbps
- D. 18 Mbps

Correct Answer: A

---

#### QUESTION 4

You want to improve host write performance on the primary storage. Two sets of OceanStor unified storage with synchronous remote replication are effective in doing this is which of the following ways? (Multiple choice.)

- A. RPO does not require 0 for the scenario, it is recommended to use asynchronous remote replication.
- B. The main storage using smart cache acceleration, speed up the main storage IO processing speed.
- C. According to the service pressure of the LUNs stored on the primary side, assign the home controllers of each LUN to the A and B controllers.
- D. If you are using an asynchronous remote replication scheme, you need to design a startup synchronization time based on the RPO metrics and consider the setting possible startup synchronization time during the business.

Correct Answer: ACD

---

#### QUESTION 5

The Huawei OceanStor storage system uses asynchronous multi-time cache for asynchronous remote replication to make the remote asynchronous RPO index of the LUN reach the second level.

- A. True
- B. False

Correct Answer: A
