

# H13-821<sup>Q&As</sup>

HCIP-Cloud Service Solutions Architect V3.0

## Pass Huawei H13-821 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.passapply.com/h13-821.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Which of the following are the functions that can be achieved after building a distributed cloud application using cloud middleware? (Multiple choices) A. Open and compatible, strong scalability

- A. Dynamic and static separation: The traffic of dynamic pages is separated from the traffic of static pages
- B. Databases and tables
- C. System decoupling
- D. Can accurately predict system performance and capacity

Correct Answer: ABCD

---

### QUESTION 2

A Pod can contain multiple containers in Kubernetes. ( ) [Multiple choice questions]

- A. True
- B. False

Correct Answer: A

---

### QUESTION 3

What is wrong with the following description of Kubernetes?

- A. Kubernetes is Google's open source container cluster management system, built on Docker technology
- B. Kubernetes cannot manage the life cycle of containers Correct
- C. Kubernetes provides cross-node service discovery and load balancing
- D. Kubernetes' self-healing mechanism makes container clusters always run in the state that users expect

Correct Answer: B

---

### QUESTION 4

Regarding the difference between stateless and stateful applications, which of the following statements are true? ( ) [Multiple choice questions]

Option Subtotal Proportion

- A. Stateful applications need to remember the specific user who initiated the request
- B. Stateful applications can achieve better scalability through code transformation

- C. Stateless applications have 100% more power than stateful applications Have higher performance
- D. Stateless applications can be deployed in containers more easily

Correct Answer: ABD

---

#### QUESTION 5

What are the following characteristics of microservices?

- A. Small: small granularity and focus on one thing
- B. Independence: separate process
- C. Light: Lightweight communication mechanism, HTTP / REST
- D. Loose interface: loosely coupled and independently deployable

Correct Answer: ABCD
