QUESTION 1

The VRRP advertfse-lnterval is 2s, preempt mode is enabled, Delay Time is 3s, then which of the following is the Master_Down_Interval time?

A. 2s

B. 4s

C. 9s

D. 6s

Correct Answer: A

QUESTION 2

When configuring Diff-Serv in QoS, the edge router on Diff-Serv network classify packets according to its source address, destination address or other parameters, assigning different IP precedence for different packets, while other routers classify packets according to IP precedence.

A. True

B. False

Correct Answer: B

QUESTION 3

Compared with VPLS, what are the characteristics of EVPN?

A. EVPN needs to be configured to be in full connection state on all PEs on the carrier\\'s backbone network. That is, PWs must be set up between any two PEs.

B. By using the EVPN technology, PB on the carrier\\'s backbone network do not need to establish full connections, which greatly reduces the network complexity and reduces the number of signaling messages.

C. EVPN enables a device to implement load balancing among multiple EVPN routes with the same destination MAC address but different next hops when managing MAC addresses.

D. The PE learns the local and remote MAC addresses and their IP addresses through ARP and MAC address advertisement routes, and caches the information locally to prevent ARP request packets from being broadcast to other PEs and reduce network resource consumption.

Correct Answer: C

QUESTION 4

Which of the following are necessary for ISIS to support MPLS TE?

A. Use command "traffic-eng" to enable ISIS-TE in IS-IS view.

B. Use command "mpls-te enable" to enable MPLS TE in ISIS view.

C. Use command "opaque-capability enable" to enable opaque capability in ISIS view.

D. Configuring wide-metric support in ISIS view.

Correct Answer: AD

QUESTION 5

The IGMP snooping configuration is as follows:

vlan batch 3 # igmp-snooping enable # vlan 3 igmp-snooping enable # interface GigabitEthernet1/0/1 port hybrid tagged vlan 3 l2-multicast static-group group-address 225.1.1.1 to 225.1.1.3 vlan 3 # interface GigabitEthernet3/0/1 port hybrid tagged vlan 3 igmp-snooplng static-router-port vlan 3

Which of the following statements are correct?

A. The device connected to GE 1/0/1 can receive multicast traffic only for the multicast groups 225.1.1.1 to 225.1.1.3. because static multicast groups are configured on GE 1/0/1.

B. The device connected to GE 1/0/1 can send Report messages to receive multicast data \\'or multicast groups outside the 225.1.1.1 to 225.1-1.3 range.

C. IGMP snooping has been enabled on the switch.

D. The device connected to GE 3/0/1 Is a multicast router.

Correct Answer: B
