- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

#### QUESTION 1

eSight uses the C/S architecture. The eSight client can access the eSight server anytime anywhere without installing any plug-in.

- A. TRUE
- B. FALSE

Correct Answer: B

---

#### QUESTION 2

What functions does the Rainbow migration tool provide? (Multiple Choice)

- A. Enhances compatibility so that mainstream virtualization platforms and operating systems are supported.
- B. Supports image conversion so that other image formats can be converted to Huawei image formats.
- C. Assesses the migration feasibility based on the source environment check items to determine whether the host at the source end meets migration requirements in advance.
- D. Provides maintainability and one-click collection.

Correct Answer: ABCD

---

#### QUESTION 3

FusionCompute consists of CNA and VRM. VRM uses VNA deployed on CNA nodes to manage all virtualization resources.

- A. TRUE
- B. FALSE

Correct Answer: A

---

#### QUESTION 4

PaaS(Platform-as-a-Service) is a mode of providing platforms as a service. The platforms can generally consist of middleware, databases, and development tools.

- A. TRUE
- B. FALSE

Correct Answer: A

---

### QUESTION 5

Which of the following statements about key FusionCompute functions is incorrect?

- A. The virtualization layer automatically binds the virtual devices involved in the I/O operation, services, and virtual interrupted threads, and allocates these resources based on NUMA nodes.
- B. A high-precision VM is a high-performance VM imposing strict requirements for the task processing performance, latency, and jittering.
- C. DRS monitors resource usage for each computing node in the same cluster in real time, and uses the VM live migration function to intelligently migrate VMs with high workloads to other nodes with sufficient resources.
- D. By taking workloads and physical resources into consideration, DRS powers off idle hosts to save energy.

Correct Answer: D
