-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Which of the following statements about the open protocol of the NDMP for network backup is independent of the platform data storage?

- A. The NAS device that supports the NDMP protocol can directly communicate with the backup server without installing the backup software client on the NAS device.
- B. When the NDMP protocol is used, the backup software, NAS devices, backup media, and production servers must support the NDMP protocol.
- C. During the backup, the NAS device transfers files and directories related to the backup media to the backup server. The backup server prepares indexes for maintenance.
- D. Backup data can be read from NAS storage devices and backed up to backup media instead of production servers. This reduces the workload on production servers.

Correct Answer: A

QUESTION 2

A connection mode between the DAS and the server. The storage device is directly connected to the server through cables (such as optical fibers). Which of the following statements are correct?

- A. The system needs to be powered off when the core components of the DAS are maintained
- B. When multiple hosts are connected to the DAS, services of different service levels can be provided
- C. The number of ports that can be connected to the host is limited
- D. The DAS with insufficient storage space can share the remaining space of the DAS with excessive storage resources

Correct Answer: B

QUESTION 3

Which of the following statements are CORRECT about the host that provides external block storage for Cinder?

- A. Cinder-API provides an interface for processing block storage access requests
- B. The Cinder-Volume service is responsible for dealing with storage servers, such as Swift and Ceph, to create and delete volumes
- C. The Cinder-Scheduler assigns tasks to servers that provide block storage
- D. Cinder modules work in message queue mode

Correct Answer: A

QUESTION 4

Huawei HiCloud platform is designed based on the mainstream microservice architecture in the industry and supports fast iteration and elastic scaling.

- A. True
- B. False

Correct Answer: A

QUESTION 5

To prevent data loss caused by misoperations, system faults, or other man-made factors, data of the entire system or a part of critical data is copied from a storage device of the primary computer system to another storage device by using a certain method, which of the following is not keypoint of a backup system?

- A. RTO
- B. HA
- C. BW
- D. RPO

Correct Answer: B
