QUESTION 1

A customer with a Hitachi NAS Platform 3200 (source) would like to relocate all the data to a new Hitachi NAS Platform 4000 (destination) using Incremental File Replication with Transfer Primary Access (TPA). Which two are required before the data migration can take place? (Choose two.)

- A. The source and destination firmware levels of the HNAS systems must be compatible for replication.
- B. The external SMU must manage the source and destination nodes.
- C. The source and destination nodes must be connected to different storage systems.
- D. The clients of the source and destination nodes must have write access to the snapshots before and after the replication.

Correct Answer: AB

QUESTION 2

Which three statements describe the Hitachi NAS Platform file system auditing capabilities? (Choose three.)

- A. CIFS clients can be audited.
- B. Auditing is enabled on a per file system basis.
- C. NFSv3 clients can be audited.
- D. Auditing events can be sent via email.
- E. NFS clients can be denied access to a file system when auditing is enabled

Correct Answer: ABE

QUESTION 3

A customer with a Hitachi NAS Platform wants to use a Hitachi VSP storage system. You need to gather information about the VSP and which storage is available. Which tool should you use to review this information?

- A. Hitachi Device Manager
- B. Hitachi Storage Navigator Modular 2
- C. Hitachi Cluster Manager
- D. Hitachi VSP manager

Correct Answer: A

QUESTION 4

A customer wants to leverage the external storage capability of their VSP system with a Hitachi NAS Platform 4000 cluster. They are planning to attach a HUS 110 with SAS 7.2K drives to the VSP. According to HDS best practices, which three use cases are appropriate for this solution? (Choose three.)

- A. home directories
- B. OLTP Database
- C. archive
- D. backup target
- E. VMware VDI desktops

Correct Answer: ACD

QUESTION 5

You are designing a Hitachi NAS Platform solution for a customer who wants to use user mapping between their Windows and UNIX environments. The user names in each environment do not match, and you need to use the customer's existing LDAP or NIS services. What are three supported schema options to perform automatic mapping? (Choose three.)

- A. /etc/users
- B. RFC-2307
- C. sfu
- D. dfs
- E. imu

Correct Answer: BCE
