QUESTION 1

A customer recently acquired a HCP system. They will be ingesting 500,000 objects (office documents) from their existing Windows file server environment to the HCP default tenant. Which two HCP protocols can be used? (Choose two.)

- A. HTTP
- B. CIFS
- C. NDMP
- D. SNMP

Correct Answer: AB

QUESTION 2

What is a valid HCP configuration?

- A. 2 node HCP 300 with RAID 5 (5+1) DPL2
- B. 4 node HCP 300 with RAID 6 (5+2) DPL2
- C. 4 node HCP 500 with RAID 5 (5+1) DPL2
- D. 4 node HCP 300 with RAID 5 (5+1) DPL2

Correct Answer: D

QUESTION 3

How does a HCP protect object metadata?

- A. The metadata protection level is matched to the DPL level set for data;
- B. The administrator sets the DPL policy required for all HCP metadata;
- C. The MDPL mechanism automatically creates two copies of the metadata;
- D. The administrator must manually execute the metadata copy command.

Correct Answer: C

QUESTION 4

A 4-Node HCP with 40 users is being managed using the single administrator function. Two new users, each from a different department, need to access data in two HCP tenants named: Financials Payable and

Financials Receivable. Which action should the administrator perform to make this happen?

- A. Create two new user accounts with security permissions.
- B. Create default accounts named Financials Payable and Financials Receivable for each user.
- C. Create a data access account for each user.
- D. Create two system administration accounts.

Correct Answer: C

QUESTION 5

A customer has their HCP system configured in enterprise mode. Which compliance role function can be performed?

- A. Delete a retention class.
- B. Modify the tenant list.
- C. View the network security settings.
- D. View the syslog configuration.

Correct Answer: A
