QUESTION 1

A customer has a cascaded Three Data Center (3DC) implementation to protect a mission critical UNIX application. The production host crashes, but the array and network are still up. The customer wants to bring up the application on a host at the local data center and still maintain two remote copies of the data, What must be performed first at the local data center?

- A. Suspend HUR pairs.
- B. Suspend TrueCopy pairs.
- C. Perform swap takeover for the HUR pairs.
- D. Perform swap takeover for the TrueCopy pairs.

Correct Answer: A

QUESTION 2

You are working on a Business Continuity plan for a customer. The customer states, "This business process is important for us but we can afford one hour data loss and two hours are tolerable to recover." Which two statements correctly reflect the business process requirements? (Choose two.)

- A. The business recovery time objective is one hour.
- B. The business recovery time objective is two hours.
- C. The business process recovery point objective is one hour.
- D. The business process recovery point objective is two hours.

Correct Answer: BC

QUESTION 3

A customer uses ShadowImage to create a copy of an online UNIX database so that it can be mounted and started on another server for testing purposes. Which two should be scripted on the recovery server prior to resynchronizing the ShadowImage pairs to ensure any volume manager changes are reflected on the recovery server after the next ShadowImage suspend? (Choose two.)

- A. unmount filesystem(s)
- B. deport/export disk group(s)
- C. SCSI inquiry to discover device(s)
- D. perform fsck on the filesystem(s)

Correct Answer: AB

QUESTION 4

A customer wants to use TrueCopy Asynchronous to copy databases to a data center 200km away from the primary site. The applications for these databases have very severe SLAs. Which two factors must be considered? (Choose two.)

- A. All data volumes must be controlled by a file system.
- B. All data volumes in the target storage unit must be offline.
- C. All data volumes in the database must be in the same Consistency Group.
- D. All data volumes in the database must be on the same type of RAID to ensure good performance.

Correct Answer: BC

QUESTION 5

A customer would like a CCI script to resynchronize all of the ShadowImage volumes on a USP100 defined in CCI. The customer is running the latest CCI version on a Solaris server using the korn shell. Several CCI device group names are used. The primary volumes are defined in horcm0.conf and the secondary volumes are defined in horcm1.conf. Which command would be used in a script to list all of the ShadowImage CCI device group names prior to executing the Pairresync command?

- A. raidqry -g
- B. raidscan -g
- C. pairedisplay -g
- D. cat /etc/horcm0.conf | grep group

Correct Answer: A
