### QUESTION 1

You have set up a Microsoft Cluster "file share" resource called "EngDep". This is dependent on a physical disk resource called "DiskE" and on a Generic Script resource called "HSCScript", which is the Hitachi Storage Cluster (HSC) script. In which file is the HORCM instance defined that needs to be active for these resources?

- A. DiskE.conf
- B. horcm0.conf
- C. EngDep.conf
- D. HSCScript.conf

Correct Answer: D

---

### QUESTION 2

A customer has an application that must have a second complete (zero RPO) copy of the data, The second site is 70km away. It is a multi-task application and has strong SLAs. Which two solutions should the customer consider to ensure that overheads are kept to a minimum? (Choose two.)

- A. 2 x USP running TrueCopy Asynchronous linked by DWDM
- B. 2 x USP running TrueCopy Synchronous linked by 2 x OC-3
- C. 2 x AMS1000 running TrueCopy Synchronous linked by DWDM
- D. 2 x USP running Hitachi Universal Replicator linked by 2 x OC-3

Correct Answer: BC

---

### QUESTION 3

What are two purposes of a TrueCopy Asynchronous Consistency Group? (Choose two.)

- A. It controls multiple volume pairs as a single entity.
- B. It provides a real-time copy of the P-VOL on the S-VOL.
- C. It allows priority to be assigned to a group of volume pairs.
- D. It ensures data is written to the S-VOL in a consistent manner.

Correct Answer: AD

---

### QUESTION 4

Your customer's business critical applications are backed up every night. The backup starts at 7:00 PM and finishes at 7:00 AM the next morning. The RPO and RTO take about two hours. The customer's focus and threat sources have changed making immediate application availability a requirement. When an update to the Business Continuity plan was recently completed, the backup was ruled out as a proper solution. Which solution will satisfy the customer's new requirements?

- A. electronic tape vaulting
- B. synchronous remote disk copy
- C. asynchronous remote disk copy
- D. synchronous remote disk copy with extended server clustering

Correct Answer: D

---

#### QUESTION 5

A customer would like a CCI script to resynchronize all of the ShadowImage volumes on a USP100 defined in CCI. The customer is running the latest CCI version on a Solaris server using the korn shell. Several CCI device group names are used. The primary volumes are defined in horcm0.conf and the secondary volumes are defined in horcm1.conf. Which command would be used in a script to list all of the ShadowImage CCI device group names prior to executing the Pairresync command?

- A. raidqry -g
- B. raidscan -g
- C. pairedisplay -g
- D. cat /etc/horcm0.conf | grep group

Correct Answer: A
