QUESTION 3

Which of the following Salesforce and Health Cloud objects can be used to represent Provider and their relationship in a Provider Management data model? (Choose Three.)

- A. Contact
- B. Healthcare Practitioner Facility
- C. Lead
- D. Case
- E. Healthcare Provider

Correct Answer: ABE

Reference and details below.

Set Up Data for Provider Cards

The data that helps users identify practitioners is stored in the provider objects. You can use Composite API requests to do populate these objects with provider and practitioner data.

You can create objects individually by using the Lightning Platform SOAP API or REST API. Or you can use the [Composite resource](#) in the REST API to create and link multiple records with a single API call. This lets you create 200 records per call.

Let's say we want to add healthcare provider Dr. Scott Kaplan to your records. This example shows how to use a single API call to create `Account`, `Contact`, `HealthcareProvider`, `PersonEducation`, `HealthcareProviderNpi`, `HealthcarePractitionerFacility`, `HealthcareProviderSpeciality`, `HealthcareFacilityNetwork`, and `HealthcareProviderTaxonomy` records with Dr. Scott Kaplan's data. It also shows how to use a composite request to link records using Dr. Kaplan's `contactId` as the `practitionerId`.

Execute this example using a composite request:
