QUESTION 1

Universal Containers provides multiple service types (i.e., Installation, Maintenance, Break/Fix, etc.). Each service requires a variety of skills and certifications in order for a resource to excel.

Which two configurations should a Consultant implement to meet this requirement? (Choose two.)

- A. Select the relevant Work Types for each Resource.
- B. Use Work Types with Required Skills.
- C. Assign the appropriate Skills to Resources.
- D. Create Multiple Work Orders Line Items per service.

Correct Answer: BC

QUESTION 2

How does Heroku Connect work with Salesforce authentication?

- A. The end user of a Heroku app authorizes Heroku Connect via OAuth.
- B. OAuth provides Heroku Connect with API tokens after the user authorizes the Heroku Connect application on Salesforce
- C. SAML authorizes Heroku Connect to make API calls
- D. A single integration user's credentials are stored.

Correct Answer: B

QUESTION 3

Universal Containers (UC) has an app that allows a customer to schedule a compute-intensive job. It allows the customer to schedule the job on an ad-hoc basis. UC has decided to break up the app into the following services:-Website: an

Interface for their customers;-Billing: generates monthly invoices based on usage metrics;-Traffic Cop:

manages the job queue, job definitions and job schedule;-Job Runner;

runs jobs that Traffic Cop queues up. It is responsible for self-introspection and self-scaling. UC also wants to create a data lake for analytics.

What foundational technology and design should an Architect use to manage communication between these services?

- A. Apache Kafka on Heroku as a bus between all services Create topics for billing, jobs, and website clicks Create an additional service, which will subscribe for all topics, and dump every message into a data lake
- B. Heroku Redis, create a large Redis store. Allow each service to place messages with an agreed-upon format into a

single queue, backed by the Redis store. Services listen for messages addressed to them and take action on them. Redis will serve as the data lake.

C. Heroku Connect and Salesforce Sync all relevant data into Salesforce and allow it to flow into each service. Create custom objects for each service and allow them to post to each other's objects as needed. Push data from Salesforce into Heroku Postgres for a data lake.

D. Apache Kafka on Heroku. Create a Kafka queue for each service. Create a central routing service that connects to all of the Kafka queues and routes data. The central router is attached to a data lake, and pushes every message into it.

Correct Answer: A

QUESTION 4

When designing a Heroku application, which two approaches observe the Twelve-Factor methodology? Choose 2 answers.

A. On deployment, Heroku fetches and installs any dependencies that are missing according to the application's list of dependencies

B. On startup, the application's source code fetches and installs any dependencies that are missing according to the application's list of dependencies.

C. The application's database configuration is stored in the application's Profile

D. The application's database configuration is stored in the application's config vars.

Correct Answer: AD

QUESTION 5

What set of configurations make up Scheduling Policies and let companies adhere to their business constraints and preferences?

A. Service Objectives and Work Rules

B. Service Levels and Work Rules

C. Service Objectives and Work Types

D. Service Contracts and Service Levels

Correct Answer: A
