Correct Answer: D

QUESTION 4

Which ArcSight ESM user type provides full privileges to use the Command Center, the ArcSight Console, the Arcsight Web client, and all tools?

- A. Web User
- B. Normal User
- C. Connector Installer
- D. Management Tool

Correct Answer: B

QUESTION 5

How are baselines established and used in Query Viewers?

- A. Baselines are created using rules. After the rule is triggered, the resulting action establishes a baseline against which future rules are evaluated in the Query Viewer.
- B. Baselines are created using query results. The baseline from the query is used to create a new field set definition that can be run against future events.
- C. Baselines are created using query results. When a query has one or more baselines available, you can compare the current results with the baseline.
- D. Baselines are created using query results and fed into the Image Editor for the related Data Monitor.

Correct Answer: C
