QUESTION 1

Once a customer has chosen an ISV for their client virtualization software, which question should you ask about that software to help choose a thin client model?

- A. If they plan to run any business productivity software on the thin clients
- B. If they plan to replace these thin clients within the next 3 years
- C. How many thin clients they need
- D. If they plan to use any redirection technologies such as HDX or RFX

Correct Answer: A

QUESTION 2

Which security features do thin clients provide to a customer? (Select two.)

- A. Thin clients create more secure network connections than desktop PCs.
- B. Thin clients cannot be stolen as easily as a desktop PC.
- C. By default, thin clients do not allow data to be stored on the local machine.
- D. Thin clients cannot be broken as easily as a desktop PC.
- E. Thin clients can be locked down so users can only access their virtual desktops.

Correct Answer: BE

QUESTION 3

Which statement is true about HP Device Manager?

- A. It is good for testing, proof of concepts, or when there is no server available for centralized management software.
- B. It is not recommended for WAN.
- C. Tasks may be automated for a near zero-touch management system.
- D. It is not recommended for larger deployments.

Correct Answer: A
