QUESTION 1

Your customer has a requirement for trending and alerting information of their HP StoreOnce Backup system. How can your customer perform this function?

- A. Install StoreOnce Enterprise Manager
- B. Configure SNMP alerting.
- C. Install HP OneView.
- D. Configure reporting within the StoreOnce GUI.

Correct Answer: A

QUESTION 2

Your customer implements some changes within the existing TCP/IP environment. The changes affect the existing HP StoreOnce Multi-node environment and the current backup infrastructure. How can you apply the new network configuration on the HP StoreOnce 6500 Backup system?

- A. Replace the old configuration with the correct TCP/IP information using the CLI parameter Pnet set change, and reboot the cluster nodes.
- B. Configure an alternate network template, and then re-apply the template with all the modified network settings.
- C. Access the console of the first node, change all the parameters, and sync the nodes within the cluster.
- D. Modify the configuration using the GUI (Device configuration - Network), and apply the configuration.

Correct Answer: A

QUESTION 3

Refer to the exhibit.

You need to re-rack the HP StoreOnce Multi-node system. How do you cable the two Nodes to the enclosure (D6000 A) during the re-racking process?
