QUESTION 1

What does HP recommend customers do when upgrading to a second processor in a DL380 Gen9 server?

A. Update the system ROM

B. Update the memory controller firmware

C. Update the RAID controller firmware

D. Update the iLO firmware

Correct Answer: D

QUESTION 2

Automatic system recovery is activated and configured through which system management tool?

A. SNMPv3

B. intelligent provisioning

C. RESTful API

D. server BIOS

Correct Answer: D

QUESTION 3

An organization needs you to change the RAID level on its servers from RAID 0 to RAID 5 for security reasons. Which tool should you use to complete this task in online mode?

A. Array Diagnostic Utility

B. Flexible Array Storage Tool

C. Smart Storage Administrator

D. Option ROM Configuration for Arrays

Correct Answer: D

Explanation:

c02110406andDocLang=enanddocLocale=en_USandjumpid=reg_r1002_usen_c-001_title_r0001

During this autoconfiguration process, ORCA uses all of the physical drives on the controller to set up the first logical drive. The RAID level used for the logical drive depends on the number of physical drives (one drive = RAID 0; two drives = RAID 1+0; three to six drives = RAID 5). If the drives have different capacities, ORCA locates the smallest drive and uses the capacity of that drive to determine how much space to use on each of the other drives.

- If the boot drive has been formatted or if there are more than six drives connected to the controller, you are prompted to run ORCA manually.

For more information about the autoconfiguration process, see the *HP ROM-Based Setup Utility User Guide* on the documentation CD provided with the server.

ORCA is available in a menu-driven interface and as a command-line interface (CLI) (not supported by ProLiant 100-series servers). These formats provide a quick and easy method for basic logical drive configuration. They have limited support for standard configuration tasks. However, these few tasks are adequate if your configuration needs are simple. For example, stripe size is predetermined by the RAID level you choose, and the size of the logical drive is determined automatically by the size of the physical drives you select.

QUESTION 4

Which features does HP Care Pack Services provide to customers\\'?(Select two.)

A. installation services

B. Intelligent Provisioning

C. Agentless Management Service (AMS)

D. expanded and extended standard warranties

E. ROI analysis for HP servers

Correct Answer: AD

Explanation:

- **HP warranties and support**—HP provides a limited warranty for ProLiant servers of either one or three years' parts and labor, depending on the server.
- **Care Pack Services**—A popular support option, Care Pack Services are support packages that expand and extend standard warranties for HP hardware and software. They provide hardware and software support, installation services, education services, and premium support options for business-critical IT environments.

QUESTION 5

What is a benefit of using an HP custom image for ESXi?

A. It contains licenses that enable HP OneView for vCenter Server.

B. It includes all of the required drivers and management software to run ESXi on HP ProLiant servers.

C. Its enhanced licensing options are available only for HP ESXi images run on ProLiant.

D. It is the only way to get VMware support on HP ProLiant servers.

Correct Answer: B
