QUESTION 1

A storage integrator is installing an HPE MSA 2042 into a remote location as a part of warehouse automation solution. The site has no IT staff and warehouse employees will not be granted access to the location where the MSA will be installed. The customer is concerned about the inability to control individual AC power outlets connected to the MSA.

Which HPE power delivery equipment can be added to the solution to address these requirements? (Choose two.)

- A. HPE G2 Metered and Switched PDU
- B. HPE Standard Series G2 Basic PDU
- C. HPE iPDU
- D. HPE G2 Metered PDU

Correct Answer: CD

QUESTION 2

A customer currently utilizing HPE 3PAR StoreServ 7200 is experiencing performance bottlenecks within their SAN storage.

Which cost-effective upsell or cross-sell HPE storage solution will offer significantly more performance and higher capacity to meet their needs and fit within their current infrastructure?

- A. HPE 3PAR StoreServ File Controller v3 System
- B. HPE 3PAR StoreServ 8440
- C. 8-node HPE 3PAR StoreServ 20000 Storage
- D. HPE StoreVirtual 3200 Storage

Correct Answer: C

QUESTION 3

A storage integrator is verifying snapshots on an HPE MSA Storage system.

Click the menu option a storage integrator should use to check the contents of a snapshot from an operating system.

Hot Area:

Action

- Create Virtual Volumes
- Create Linear Volumes
- Create Snapshot
- Modify Volume
- Copy Volume
- Rollback Volume
- Create Replication Set
- Initiate Replication
- Map Volumes
- View Map Details
- Add to Volume Group
- Remove from Volume Group
- Delete Volumes
- Rename Volume Group
- Remove Volume Group
- Reset Snapshot
- Manage Schedules
