Following Questions and Answers are all new published by HP Official Exam Center

QUESTION 1

A customer has a requirement to provide disaster recovery for an application. The application has an RPO of 30 mins, with an RTO of 15 mins. How can HPE 3PAR Remote Copy help meet the customer\'s specified requirements in the most cost effective manner?

A. by using Periodic Asynchronous Replication with an interval of 15 mins

B. by using Synchronous Long Distance Mode

C. by using Synchronous Replication

D. by using Streaming Asynchronous replication with an interval of 15 mins

Correct Answer: A

QUESTION 2

A customer needs a new replication solution that makes use of capacity efficiency technologies, even though data is being replicated to another array. You have been developing a solution that includes two HPE 3PAR arrays. What should you emphasize in your proposal?

A. The arrays share deduplication hash tables, and the target array only needs to compress the replicated data from the source array

B. Compression technologies increase the effective bandwidth being available for replication and disaster recovery

C. Thin Technologies, deduplication, and compression can be used on both sides with volumes in Remote Copy groups

D. The data being replicated will travel the connection between the arrays fully compressed and deduplicated

Correct Answer: D

QUESTION 3

You are starting an assessment to design a new multi-storage environment for a customer. You have collected data on all the current arrays using SAF collector. What should be the next step in your design process?

A. Open the .zip file with NinjaSTARS

B. Import the .zip file into OCA

C. Send the .zip file to OCAImport@hpe.com

D. Upload the .zip file to the SAF Portal

Correct Answer: D

QUESTION 4

You are designing an HPE 3PAR replication solution for a customer in a metropolitan area that includes two main sites and a third disaster recovery site. The main sites will be in synchronous replication. The disaster recovery site can be asynchronously replicated.

What are two points you should highlight to the customer? (Select two.)

A. Tertiary site volume paths are active/read only

B. Quorum Witness at the third site enables automatic failover to tertiary site

C. Secondary site volumes paths are active/optimized read/write

D. Quorum Witness at the third site enables automatic failover to the secondary site

E. Primary site volumes paths are standby read/write

Correct Answer: AD

QUESTION 5

You want to use FCAP authentication in an environment with FOS 7.3 running switches with no extra licenses. What should you do to use this feature?

A. Switches must be upgraded to FOS 7.4 or higher

B. Certificates must be obtained from Brocade

C. A Secure Fabric license must be added to all switches in the fabric

D. Certificates must be obtained from a third-party vendor

Correct Answer: D
