QUESTION 1

A customer wants to implement a disaster recovery plan for their current HPE 3PAR array data. They have obtained a remote site 10km away their primary site. They have performed bandwidth testing, and have confirmed their RTT is approximately 100ms. The customer needs to provide data replication to assure the best data availability they can achieve. Which synchronization method meets their needs?

- A. Asynchronous Streaming
- B. Asynchronous Periodic Remote Copy
- C. Synchronous Remote Copy
- D. Peer Persistence

Correct Answer: B

QUESTION 2

You have chosen to utilize HPE 3PAR synchronous replication in order to meet the customer stated requirement of RPO=0. What is a key consideration you need to explain to the customer?

- A. Host write latencies will decrease
- B. Host write latencies will increase
- C. Host writes can be committed to either primary or backup storage before host acknowledgment
- D. RC sync can only be deployed over FC links

Correct Answer: B

QUESTION 3

For customers, what are the benefits of developing a company compliance policy? (Select two.)

- A. reduced head count
- B. minimized losses
- C. improved security
- D. improved agility
- E. increased time to market

Correct Answer: BC

QUESTION 4

You are designing an HPE 3PAR replication solution for a customer in a metropolitan area that includes two main sites and a third disaster recovery site. The main sites will be in synchronous replication. The disaster recovery site can be asynchronously replicated.

What are two points you should highlight to the customer? (Select two.)

- A. Tertiary site volume paths are active/read only
- B. Quorum Witness at the third site enables automatic failover to tertiary site
- C. Secondary site volumes paths are active/optimized read/write
- D. Quorum Witness at the third site enables automatic failover to the secondary site
- E. Primary site volumes paths are standby read/write

Correct Answer: AD

QUESTION 5

A customer needs to upgrade their existing HPE 3PAR environment. They ask you to present a solution to gather data from all 200 of their HPE 3PARs arrays, which are spread across the globe. The arrays consist of various generations and OS levels, and they are managed by regional instances of SSMC. What should you present to the customer as a solution?

- A. using an HPE 3PAR CLI script with the checkupgrade command
- B. using a script based on the HPE 3PAR Web Services API
- C. using the upgrade report tool in HPE InfoSight
- D. using the SSMC array configuration reports

Correct Answer: D
