### QUESTION 1

Which statement is correct about virtualized snapshot services on an HPE MSA 1040?

- A. The appropriate license must be purchased
- B. Some operating systems support snapshots.
- C. The HPE MSA 1040 does not support virtualized snapshots.
- D. No special license is needed as virtualized snapshots are supported by default

Correct Answer: A

---

### QUESTION 2

A customer has concerns about backup on the infrastructure and virtual machine performance during backup time. The customer is using Veeam Backup and Replication as their primary backup tool. You recommend the use of a snapshot integration

How does this reduce the impact?

- A. It writes the data directly from the storage to the backup device.
- B. It initiates storage snapshots and mounts them to the backup host.
- C. It performs a LUN level snapshot of all VMs and backs them up.
- D. It creates a snapshot of each virtual machine and writes the data through the ESX host

Correct Answer: B

---

### QUESTION 3

A backup and restore environment is being designed to use Synthetic backup Which statement describes this operation?

- A. Data created or modified since the last full or incremental backup, plus data accessed (touched) during a specified time frame, will be copied
- B. Take the last full backup, and append the incremental or differential backups to the full backup set.
- C. Database activity is quiesced to ensure that buffers and cached data are flushed to disk before the split is backed up.
- D. Copy all files that have been created or modified since the last full or incremental backup.

Correct Answer: B

---

#### QUESTION 4

You are demonstrating to a potential customer how easy it is to replicate data from one HPE 3PAR StoreServ array to another. The demonstration is being done with both arrays connected to a pair of SAN switches. The customer asks what it would take to extend their SAN over very large distances.

What should you recommend they use to accomplish this?

- A. multi-mode replication
- B. wave division multiplexing
- C. FCIP routing
- D. low-bandwidth replication

Correct Answer: C

---

#### QUESTION 5

A customer's backup solution performs daily full backups of the environment. The customer is asking for a different solution due to the amount of time it takes on a daily basis. They only need to be able to keep copies of recently changed files to restore if a problem occurs. Full backups will continue to be performed on weekend days, but the customer wants a solution for non-weekend days.

Which backup solution helps accomplish this?

- A. archive and backup
- B. image-based
- C. differential
- D. file-based

Correct Answer: C
