Following Questions and Answers are all new published by HP Official Exam Center

QUESTION 1

A customer needs to offload disk I/O caused by nightly backups from their production HPE 3PAR StoreServ Disk Array. They have two other HPE 3PAR Disk Arrays. One is located at their disaster recovery (DR) site located 300 km away, and the other is used for their Test/Dev environment located in the same datacenter.

What should you recommend to accomplish this? (Select two)

A. Set up HPE 3PAR synchronous replication between the production and Test/Dev disk arrays.

B. Create a snapshot of the replicated volumes on the production array and present to the backup system.

C. Set up HPE 3PAR synchronous replication between the production and DR disk arrays.

D. Create a snapshot of the replicated volumes on the Test/Dev array and present to the backup system.

E. Set up HPE 3PAR enhanced asynchronous replication between the production and DR disk arrays.

Correct Answer: AD

QUESTION 2

Arrange the levels of data availability in the correct sequence, from highest to lowest

Select and Place:

	Sequence	
High Availability	1	
Fault Tolerant	2	
Conventional	3	
Highly Reliable	4	
Fault Resilient	5	

Correct Answer:

Sequence		
	1	Fault Tolerant
	2	Fault Resilient
	3	High Availability
	4	Highly Reliable
	5	Conventional

QUESTION 3

You are demonstrating to a potential customer how easy it is to replicate data from one HPE 3PAR StoreServ array to another. The demonstration is being done with both arrays connected to a pair of SAN switches. The customer asks what it would take to extend their SAN over very large distances.

What should you recommend they use to accomplish this?

A. multi-mode replication

B. wave division multiplexing

C. FCIP routing

D. low-bandwidth replication

Correct Answer: C

QUESTION 4

What is the purpose of encryption of data-at-rest on a backup device?

A. It prevents external access to the removable media

B. it prevents unauthorized users from restoring the data

C. It protects removable media from unauthorized access

D. It allows security auditing of data on the storage device

Correct Answer: C

QUESTION 5

A customer has two data centers approximately 50 miles (80 km) apart with an HPE 3PAR StoreServ 8000 in each one Both arrays have the Replication Suite license installed.

The current backup solution is based on a tape backup that regularly exceeds their backup window. There are also concerns about securing the physical tapes. Your backup solution must address all of their concerns and keep costs to a minimum

Which HPE product should you incorporate in your design?

A. HPE 3PAR Remote Copy Software

B. HPE 3PAR Cluster Extension

C. HPE StoreOnce Recovery Manager Central

D. HPE StoreOnce Backup System with Catalyst

Correct Answer: D
