### QUESTION 1

When zoning by NBA port in large SAN infrastructures, which feature is a benefit?

- A. prevention of zone overlapping
- B. server-side duplication +
- C. simplified device discovery
- D. SAN attached storage backups

Correct Answer: C

---

### QUESTION 2

A customer has two data centers approximately 50 miles (80 km) apart with an HPE 3PAR StoreServ 8000 in each one. Both arrays have the Replication Suite license installed.

The current backup solution is based on a tape backup that regularly exceeds their backup window. There are also concerns about securing the physical tapes. Your backup solution must address all of their concerns and keep costs to a minimum.

Which HPE product should you incorporate in your design?

- A. HPE 3PAR Remote Copy Software
- B. HPE 3PAR Cluster Extension
- C. HPE StoreOnce Recovery Manager Central
- D. HPE StoreOnce Backup System with Catalyst

Correct Answer: D

---

### QUESTION 3

Match each availability level to its description.

Select and Place:

High Availability	<input type="text"/>	business functions that require uninterrupted computing services
Conventional	<input type="text"/>	business functions that allow minimally interrupted computing services
Highly Reliable	<input type="text"/>	business functions that demand continuous computing
Fault Tolerant	<input type="text"/>	business functions that can be interrupted as long as the integrity of the data is ensured
Fault Resilient	<input type="text"/>	business functions that can be interrupted and where data integrity of the data is not essential

Correct Answer:

<input type="text"/>	Fault Resilient	business functions that require uninterrupted computing services
<input type="text"/>	High Availability	business functions that allow minimally interrupted computing services
<input type="text"/>	Fault Tolerant	business functions that demand continuous computing
<input type="text"/>	Highly Reliable	business functions that can be interrupted as long as the integrity of the data is ensured
<input type="text"/>	Conventional	business functions that can be interrupted and where data integrity of the data is not essential

#### QUESTION 4

A Customer needs a backup solution for their virtual environment. Their 35 TB Microsoft Windows file server data is business critical. Match the recovery point objective to the most cost effective solution to achieve it

Select and Place:

Days	<input type="text"/>	HPE 3PAR StoreServ systems using synchronous replication
Weeks	<input type="text"/>	HPE StoreOnce 4700
Seconds	<input type="text"/>	HPE StoreVirtual Remote Copy
Hours	<input type="text"/>	MSL6480 with 4x LTO-6 drives

Correct Answer:

	Seconds	HPE 3PAR StoreServ systems using synchronous replication
	Days	HPE StoreOnce 4700
	Hours	HPE StoreVirtual Remote Copy
	Weeks	MSL6480 with 4x LTO-6 drives

### QUESTION 5

Which advantage does the HPE StoreOnce Backup System have over traditional, tape- style backup solutions?

- A. it is less costfy than tape solutions
- B. it uses a virtual base appliance.
- C. It uses FCoE technology.
- D. It uses disk-based storage

Correct Answer: D
