QUESTION 1

A customer has a multi-site environment and plans to consolidate file-and-block-level data. A proof of concept is arranged to familiarize the customer with HPE 3PAR StoreServ File Persona functionality.

Which statement is true when failing over file-level data between the arrays?

- A. The Peer Persistence Arbitrator must register the file shares before a failover is initiated.
- B. An automated failback is initiated once the primary storage system comes back online.
- C. The clients must reconnect to NAS shares once failover is complete.
- D. A second cluster IP must be configured as a DNS alias for the file shares running on the HPE 3PAR StoreServ.

Correct Answer: D

QUESTION 2

What happens during the fabric login (FLOGI) during the Fibre Channel registration process? (Select two.)

- A. Service parameters are exchanged
- B. Buffer-to-buffer credits are initiated
- C. E_Port FCIDs are assigned
- D. F_Port error counters are cleared
- E. Connections between N-Ports are established

Correct Answer: AE

QUESTION 3

As part of solution tuning, you want to add online, application-consistent snapshots to a customer's environment.

Which tasks must be performed? (Select two.)

- A. Delete the snapshot
- B. Stop the VM
- C. Release file locks
- D. Flush the buffers
- E. Quiesce the file system

Correct Answer: DE

QUESTION 4

You size a Remote Copy solution for an HPE StoreServ customer. Which best practice should be implemented concerning Virtual Volumes (VVs)?

- A. All VVs should be put into their own Remote Copy group BAll VVS belonging to the same application should be added to the same Remote Copy group
- B. All VVs belonging to the same application should be added to the same Remote Copy group
- C. All VVs should be spread evenly across all available Remote Copy groups
- D. All VVs belonging to the same application should be added to different Remote Copy groups

Correct Answer: B

QUESTION 5

While discussing an upcoming technology refresh with a customer, the topic of the HPE Federated Peer Motion technology comes up. How might this technology be useful in the customer's environment? (Select two.)

- A. to provide high availability of virtualized environments across metropolitan data centers
- B. to load balance I/O at a chunklet level across systems
- C. to load balance I/O workloads across systems
- D. to provide fault tolerance at the array level
- E. to enable data to be migrated among a maximum of four HPE 3PAR StoreServ Disk Arrays

Correct Answer: CD
