QUESTION 1

As part of solution tuning, you want to add online, application-consistent snapshots to a customer's environment.

Which tasks must be performed? (Select two.)

- A. Delete the snapshot
- B. Stop the VM
- C. Release file locks
- D. Flush the buffers
- E. Quiesce the file system

Correct Answer: DE

QUESTION 2

A customer purchased an HPE 3PAR all-flash array to accelerate the company's databases. The customer is concerned about the risk of data loss. Synchronous replication is currently being used, but it is causing slow I/O due to limited network bandwidth and latency, both of which cause application slowdown.

Which alternative solution should you propose to address the issue?

- A. Asynchronous Streaming Remote Copy
- B. Synchronous Long Distance Remote Copy
- C. Periodic Asynchronous Remote Copy
- D. Peer Persistence

Correct Answer: C

QUESTION 3

You begin your first presentation to a customer by positioning HPE OneView as a converged management tool. The customer requires the use of the VMware vSphere API for Storage Awareness (VASA) integration in their future management solutions.

Which HPE storage products can be used in your design to support this customer's needs? (Select two.)

- A. HPE ConvergedSystems
- B. HPE StoreEver
- C. HPE StoreVirtual
- D. HPE StoreOnce

E. HPE 3PAR StoreServ

Correct Answer: CE

QUESTION 4

What must be done before demonstrating Recovery Manager Central Express Protect?

- A. The storage array must be configured for file and block data
- B. The StoreOnce system must be set up with a fileshare
- C. A StoreOnce replication license must be activated
- D. A StoreOnce Catalyst license must be activated

Correct Answer: D

QUESTION 5

You are planning an HPE StoreVirtual architecture based on a customer's physical site configuration. The customer has two physical sites and wants to span the cluster between them and requires that all sites should be peers.

What should be done to meet this customer's requirements?

- A. Configure a Failover Manager in each physical site.
- B. Configure the cluster to span both sites, and configure one site as primary site.
- C. Create an additional logical site at each physical site with a Failover Manager.
- D. Create a logical third site to provide a Failover Manager.

Correct Answer: B
