### QUESTION 1

What happens during the fabric login (FLOGI) during the Fibre Channel registration process? (Select two.)

- A. Service parameters are exchanged
- B. Buffer-to-buffer credits are initiated
- C. E\_Port FCIDs are assigned
- D. F\_Port error counters are cleared
- E. Connections between N-Ports are established

Correct Answer: AE

---

### QUESTION 2

A storage architect is reviewing customer as-built documentation and a proposed design for an HPE 3PAR StoreServ deployment. The array must be installed in a co-location facility in facility-supplied-and-managed racks. The storage architect has determined that service clearances and power are adequate. The proposed design is storage-centric and will require two racks to accommodate all the disk enclosures.

What should the storage architect consider when validating the design?

- A. The correct number of SAS Active Optical Cables (AOC) are included.
- B. The correct number of InfiniBand cables are included.
- C. Expansion is only supported in HPE racks.
- D. The correct number of Fiber Channel Cables are required

Correct Answer: A

---

### QUESTION 3

A customer wants to lower operational costs by automating Brocade SAN Fabric Zoning to their HPE 3PAR StoreServe array. Which HPE tools can do this for your customer? (Select two.)

- A. HPE 3PAR Management Console
- B. HPE OneView
- C. HPE 3PAR SmartStart
- D. HPE 3PAR Rapid Provisioning
- E. HPE Smart SAN for HPE 3PAR

Correct Answer: DE

---

#### QUESTION 4

While discussing an upcoming technology refresh with a customer, the topic of the HPE Federated Peer Motion technology comes up. How might this technology be useful in the customer's environment? (Select two.)

- A. to provide high availability of virtualized environments across metropolitan data centers
- B. to load balance I/O at a chunklet level across systems
- C. to load balance I/O workloads across systems
- D. to provide fault tolerance at the array level
- E. to enable data to be migrated among a maximum of four HPE 3PAR StoreServ Disk Arrays

Correct Answer: CD

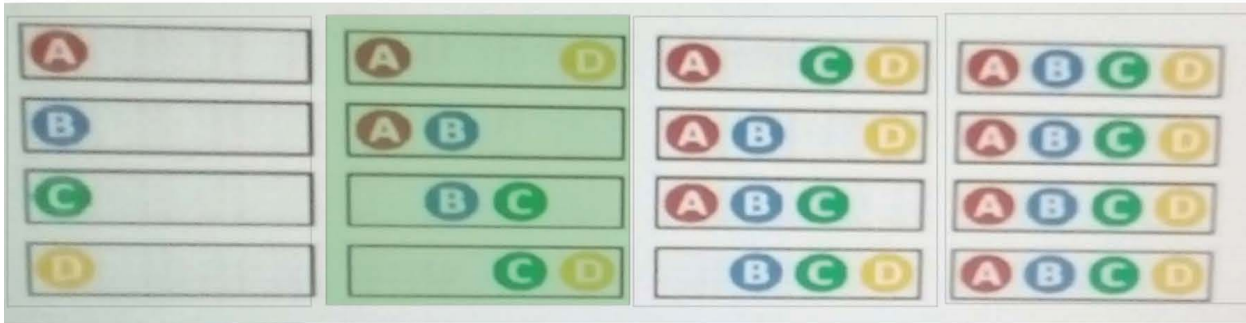

#### QUESTION 5

The exhibit shows the 4 types of StoreVirtual Network RAID 0, 10, 10+1 and 10+2. A customer has three sites and needs a copy of data at each site. Click on the Network RAID level that you should recommend.
