QUESTION 1

Which components are typically redundant in a tower server? (Select two.)

- A. processors
- B. fans
- C. management modules
- D. voltage regulator modules
- E. power supplies

Correct Answer: BE

QUESTION 2

A customer plans to use Flat SAN technology to connect a new storage system.

Why would the customer choose the Virtual Connect Flat SAN technology connected to a 3PAR StorServ storage system versus a competitive solution?

- A. It helps create multi-tiered SANs, and increases throughput and resiliency.
- B. It eliminates the SAN fabric by off-loading the workload to a switch.
- C. It reduces the number of component, lowers latency, and speeds deployment.
- D. It uses the RESTful API connections to simplify managing the entire solution.

Correct Answer: C

QUESTION 3

Why does HPE OneView not affect operating systems security on monitored HPE ProLiant Gen9 servers?

- A. It sets secure usernames and strong passwords in the server operating system.
- B. It uses iLO embedded SNMP stack to receive hardware alerts.
- C. It relies on Kerberos for health-related communications.
- D. It uses certificate-based authentication for health-related communications.

Correct Answer: B

QUESTION 4

A customer reports a recent SSD drive failure in an HPE D2220sb Storage Blade that hosts its Virtual Desktop infrastructure environment. The customer is concerned about the remaining expected lifetime of the SSD drivers in its array.

Which tool includes the SmartSSD Wear Gauge report that identifies drives at risk of failure?

- A. HPE OneView (Volumes screen)
- B. HPE SmartCache
- C. HPE Smart Storage Administrator
- D. HPE ROM Configuration for Arrays

Correct Answer: C

QUESTION 5

A customer is using an HPE BladeSystem c7000 enclosure with Virtual Connect 20/40 F8 modules. The customer plans to improve network redundancy between the VC modules by creating LACP aggregated links from each single VC module to two different physical ToR switches.

Which HPE networking technology should the architect recommend to the customer?

- A. intelligent Resilient Framework (IRF)
- B. Spanning Tree Protocol (STP)
- C. Multiple Spanning Tree Protocol (MSTP)
- D. Open Shortest Path First (OSPF)

Correct Answer: A
