QUESTION 1

A customer has acquired another company with a large install base of HPE BladeSystem servers with Virtual Connect managed by HPE OneView. The customer needs the ability to easily record its new assets in its configuration management database (CMDB).

Which approach should the architect recommend to the customer?

- A. Use VCEM to create a customized report to find all blade servers, and use the results for import into the CMDB.
- B. Back up the HPE OneView appliance database, and use the bulk copy capability of the CMDB to insert the records.
- C. Use the REST API to retrieve a list of server resources and their properties from the HPE OneView appliance for import into the CMDB.
- D. Use iLO Federation groups, and select the multi-system view to gather the hardware types and serial numbers of each server in the group for import into the CMDB.

Correct Answer: C

QUESTION 2

An architect is designing a Citrix XenServer-based virtualization solution that runs on HPE ProLiant Gen9 servers.

Which design parameters should the architect take into consideration as part of the solution? (Select two.)

- A. memory consumed by the control domain on the host
- B. 35 percent additional hardware resources for host server overhead
- C. memory consumed by the XenServer crash kernel
- D. FCoE dedicated network for XenServer migrations
- E. NVDIMMs configured as caching modules for the host OS installation

Correct Answer: DE

QUESTION 3

How does the HPE BladeSystem architecture meet the changing needs of data center customers?

- A. introduction of Active Health System monitor
- B. system management using HPE Virtual Connect modules
- C. enables customers to shift investment from maintenance to innovation
- D. consolidate deployment of firmware via HPE Agentless Management

Correct Answer: B

QUESTION 4

Which solution enables a customer to manage all operating system drivers and system firmware across the data center from one central location?

- A. HPE OneView with Federation Group license
- B. REST API with Embedded UEF0 Shell scripts
- C. HPE Synergy Composer and HPE Synergy Image Streamer
- D. HPE Smart Update solution

Correct Answer: D

QUESTION 5

A customer needs to deploy SAP HANA. The customer needs a scale-out solution to accommodate an increase in workload over the next two years.

Which ProLiant series should the architect recommend to the customer?

- A. HPE ProLiant 300
- B. HPE ProLiant 100
- C. HPE ProLiant BladeSystem
- D. HPE ProLiant 500

Correct Answer: D
