QUESTION 1

A customer has acquired another company with a large install base of HPE BladeSystem servers with Virtual Connect managed by HPE OneView. The customer needs the ability to easily record its new assets in its configuration management database (CMDB).

Which approach should the architect recommend to the customer?

- A. Use VCEM to create a customized report to find all blade servers, and use the results for import into the CMDB.
- B. Back up the HPE OneView appliance database, and use the bulk copy capability of the CMDB to insert the records.
- C. Use the REST API to retrieve a list of server resources and their properties from the HPE OneView appliance for import into the CMDB.
- D. Use iLO Federation groups, and select the multi-system view to gather the hardware types and serial numbers of each server in the group for import into the CMDB.

Correct Answer: C

QUESTION 2

How does HPE offer infrastructure as a service differentiator?

- A. providing a dedicated manual process for each infrastructure product
- B. using converged, software-defined, and cloud ready resources
- C. offering a siloed technology-centric physical infrastructure
- D. optimizing workloads with a common modular architecture

Correct Answer: B

QUESTION 3

A customer plans to use Flat SAN technology to connect a new storage system.

Why would the customer choose the Virtual Connect Flat SAN technology connected to a 3PAR StorServ storage system versus a competitive solution?

- A. It helps create multi-tiered SANs, and increases throughput and resiliency.
- B. It eliminates the SAN fabric by off-loading the workload to a switch.
- C. It reduces the number of component, lowers latency, and speeds deployment.
- D. It uses the RESTful API connections to simplify managing the entire solution.

Correct Answer: C

QUESTION 4

A customer plans to transition from rack mount servers to blade servers. The customer has selected Virtual Connect as the network interconnect module for the c7000, allowing it to take advantage of network virtualization. The customer needs an on-premise management strategy that can take advantage of the RESTful API for integration into its Chef development operations model.

Which protocol should the architect recommend to support and manage the proposed HPE BladeSystem solution?

- A. HPE Systems Insight Manager
- B. HPE OneView
- C. HPE Virtual Connect Enterprise Manager
- D. HPE Virtual Connect Manager

Correct Answer: B

QUESTION 5

What is the purpose of conducting a customer site survey?

- A. Identify the type of servers that will be included in the solution.
- B. Access the facility and its suitability for the proposed solution.
- C. Identify the customer's business goals for the solution.
- D. Determine the different workloads the customer is running.

Correct Answer: B
