QUESTION 1

A customer has a multi-frame Synergy solution. The customer's Support team recently missed some important alerts in its Composer interface because each pair of Composers resides on a separate management network. What should the customer do to minimize the risk of this reoccurring?

- A. Configure HPE Intelligent Management Center.
- B. Implement HPE Synergy Global Dashboard.
- C. Configure Remote Support.
- D. Implement HPE Systems Insight Manager.

Correct Answer: B

QUESTION 2

A customer is using HPE Synergy Composer to manage the compute module and 3PAR volume attachments. The datastore attached to VMware servers has run out of space. What is the most efficient procedure the Synergy integrator should follow to extend the volume with minimum effect on the compute modules?

- A. Set the volume to maintenance mode and increase the volume in 3PAR SSMC.
- B. Create a snapshot and increase the capacity of the snapshot directly in the Synergy Composer.
- C. Increase the capacity of the volume in the combined profile form.
- D. Increase the capacity of the volume directly in the Synergy Composer.

Correct Answer: D

QUESTION 3

As part of a Synergy implementation, a Synergy integrator needs to create 100 networks in a Logical Interconnect Group (LIG) configuration. The network administrator for the end-of-row (EoR) switches provides a CSV file with the network that need to be created.

How should the Synergy integrator automate the creation of the 100 networks?

- A. Upload the CSV file to the Composer and execute the Create Network wizard.
- B. Use the HPE OneView PowerShell library to create the networks listed in the CSV file.
- C. Start HPE SUT to migrate the CSV file to a Synergy configuration file and upload it to the composer.
- D. Configure Image Streamer to automate the network configuration.

Correct Answer: B

QUESTION 4

A Synergy integrator needs to add more NICs to a server profile.

What does the integrator need to be aware of when performing this action?

- A. The host needs to be powered off to activate the change.
- B. The Virtual Connect modules need to be rebooted once the profile is applied.
- C. The server profile template must be changed before modifying the server profile.
- D. The host networks will go offline when the profile is assigned.

Correct Answer: C

QUESTION 5

In a 3-frame HPE Synergy environment, how should a Synergy integrator place the Image Streamer modules to allow for redundancy to all of the management connections?

- A. one Image Streamer module in each Synergy frame (3 total)
- B. one Image Streamer module in frame 2 and a second Image Streamer Module in frame 3 (2 total)
- C. two Image Streamer modules in the frame 1 (2 total)
- D. two Image Streamer modules in frame 2 and two Image Streamer Module in frame 3 (4 total)

Correct Answer: C
