### QUESTION 1

You prepared a proposal for a customer that plans to deploy Hyper-V clusters that include network adapters with RoCE support. The customer would like to know why this specific adapter was included in the proposal.

How would you explain your choice?

- A. RoCE adapters offer Secure Encryption functionality that can help to secure migration traffic
- B. RoCE adapters are the only adapters certified to use in Hyper-V based cluster
- C. RoCE adapters can use 100 Gb/s speed for internal virtual machine migrations
- D. RoCE adapters will improve performance for live migration and Microsoft SMB Direct environments

Correct Answer: D

---

### QUESTION 2

You are introducing Synergy to a new customer. Which tool can you use to demonstrate the physical components of the Synergy frame and how they connect?

- A. HPE Product Bulletin
- B. HPE Synergy Planning Tool
- C. HPE Product Tour
- D. HPE PartSurfer

Correct Answer: B

Reference: <https://support.hpe.com/hpsc/doc/public/display?docId=c05061206> (p.33, power supply configurations)

---

### QUESTION 3

A customer needs a server that: supports their in-memory database is oriented towards business critical workloads

Which questions should you ask before you make a recommendation? (Choose two.)

- A. How much memory will the application require?
- B. How will the operating systems and application be deployed?
- C. How important is it for the server to support ASHRAE A3/A4 standards?
- D. How many cores are required to optimize the application
- E. How will the datacenter provide backup power in the event of failure

Correct Answer: AD

#### QUESTION 4

A solution architect wants to verify compatibility between a CNA and a 3PAR system. The Solution Architect is looking for reference material on SAN components, configuration support, and best practices. What should you use?

- A. HPE Storage Sizer
- B. Brocade Network Advisor (BNA)
- C. Single Point of Configuration Knowledge (SPOCK)
- D. HPE OneView Deployment and Management Guide

Correct Answer: C

---

#### QUESTION 5

You need to demonstrate the runtime firmware verification scan functionality on a ProLiant DL380 Gen10 server. You find that the option is not available in the UEFI interface.

What is the most likely cause of the problem?

- A. The server boot mode is set to UEFI
- B. The Onboard Administrator has not been initialized
- C. The file firmware-ilo5-1.10.1.1.x86\_64.rpm is the incorrect version
- D. The required iLO license has not been installed

Correct Answer: D
