QUESTION 1

Your customer has completed a successful Synergy Proof of Concept (PoC) consisting of a single frame with dual composers and dual Virtual Connect SE 40Gb F8 modules.

The customer wants to: add a second frame before they move into production have unified management have a separate logical enclosure for each frame

What are the basic steps to add the second frame? (Choose three.)

A. Move the standby composer to the second frame.

B. Disconnect the existing management ring, and then cable the FLM (frame link module) in the first frame to the FLMs in the second frame.

C. Install a satellite module in the first frame.

D. Move the bottom VC module from the first frame to the second.

E. Move one of the uplinks from the FLM in the first frame to a FLM in the second.

Correct Answer: ABE

QUESTION 2

A customer is considering deploying a significant number of HPE BladeSystem Gen10 servers with an HPE 3Par storage solution for a new cloud solution. You propose HPE OneView as the management platform.

Which HPE OneView feature should you emphasize during conversations with the customer?

A. patch deployment for operating system and storage components

B. operating system deployment through Image Streamer

C. servers and storage firmware upgrades

D. volume presentation from the 3Par and automated zoning

Correct Answer: D

QUESTION 3

A customer is using a DL380 Gen10. They attempt to boot an installation media ISO with iLO Virtual Media, and the system fails to access the ISO. What are the most likely causes of this issue? (Select two.)

A. HPSSA drives are configured for RAID 1 and not RAID 5

B. Legacy Boot is not enabled and the media is not UEFI compatible

C. Secure Boot has derived access to the ISO

D. The ISO operating system is not supported by HPE

E. UEFI is not configured for iSCSI initiator support

Correct Answer: CD

QUESTION 4

A customer has a traditional physical server environment and would like to run an on-site proof of concept (PoC) to evaluate OneView\\'s ability to manage their ProLiant DL380\\'s and their c7000 blades. What does the customer need to implement this PoC?

A. Synergy composer

B. iLO Amplifier Pack

C. a supported hypervisor

D. Synergy Image Streamer

Correct Answer: B

QUESTION 5

A customer needs a server that: supports their in-memory database is oriented towards business critical workloads

Which questions should you ask before you make a recommendation? (Choose two.)

A. How much memory will the application require?

B. How will the operating systems and application be deployed?

C. How important is it for the server to support ASHRAE A3/A4 standards?

D. How many cores are required to optimize the application

E. How will the datacenter provide backup power in the event of failure

Correct Answer: AD
