QUESTION 1

HOTSPOT

An HPE Synergy customer needs to prevent a timeout and loss of communication during an external switch firmware upgrade.

Click the parameter that the customer should configure within an uplink set to meet this requirement.

Hot Area:

Create Uplink Set ?

General

Name	<input type="text" value="Prod-US"/>
Consistency checking	<input type="text" value="Exact match"/>
Type	<input type="text" value="Ethernet"/>
Connection mode	Automatic
LACP timer	<input type="text" value="Short (1s)"/>
LACP load balancing	<input type="text" value="Source & Destination MAC Address"/>
LACP failover trigger	<input type="text" value="All active uplinks transition to offline"/>
LACP distribute uplink ports	<input checked="" type="checkbox"/>

Correct Answer:

Create Uplink Set ?

General

Name	<input type="text" value="Prod-US"/>
Consistency checking	<input type="text" value="Exact match"/>
Type	<input type="text" value="Ethernet"/>
Connection mode	Automatic
LACP timer	<input type="text" value="Short (1s)"/>
LACP load balancing	<input type="text" value="Source & Destination MAC Address"/>
LACP failover trigger	<input type="text" value="All active uplinks transition to offline"/>
LACP distribute uplink ports	<input checked="" type="checkbox"/>

QUESTION 2

HOTSPOT

Your customer is implementing an HPE Synergy solution based on three frames.

Click each of the ports that can be used to connect satellite modules.

Hot Area:

Correct Answer:

QUESTION 3

DRAG DROP

You need to setup HPE Synergy frames after hardware components are discovered within HPE OneView.

Put the steps to achieve this goal into the coned order in the answer area on the right.

Select and Place:

Steps

- Create a logical enclosure.
- Create a logical interconnect group with uplink sets.
- Create an enclosure group.
- Create server profile templates and server profiles.
- Define all required networks.

Answer Area

Correct Answer:

Steps

Answer Area

- Create a logical interconnect group with uplink sets.
- Create a logical enclosure.
- Create an enclosure group.
- Create server profile templates and server profiles.
- Define all required networks.

QUESTION 4

DRAG DROP

Put the steps of the HPE infosight flow in the correct order.

Select and Place:

Steps

- Observing
- Learning
- Recommending
- Predicting
- Acting

Answer Area

-
-
-
-
-

Correct Answer:

Steps

Answer Area

- Observing
- Learning
- Predicting
- Recommending
- Acting

QUESTION 5

HOTSPOT

Click the drop-down menu that will allow you to define the location of the master modules within the logical interconnect group.

Hot Area:

Create Logical Interconnect Group General ?

General

Name

Logical Interconnect Group

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type

Enclosure count

Interconnect bay set

Redundancy

Downlink speed

Select interconnects

Correct Answer:

Create Logical Interconnect Group General ?

General

Name

Logical Interconnect Group

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type

Enclosure count

Interconnect bay set

Redundancy
