Following Questions and Answers are all new published by HP Official Exam Center

**QUESTION 1**

You are optimizing the design of an existing data protection solution. The customer is using the following systems in their environment HPE OL380 Gen8/9/l0 servers HPE Nimble AF60 HPE StoreEver MSL6030 tape library with LT04 drives ?HPE FlexFabric 590O switches for LAN and SAN connectivity (ISCSI based) ?VMware ESXI 6.5 Windows 2016 veeam 9.5U2

You want to replace the aging tape library with a new HPE StoreOnce 5650 solution with VTL virtual tape library and Catalyst targets with HPE Nimble snapshot Integration is this what you should use to assess current backup deployment? Solution:Use Veeam Platform Support to validate that the currently-used Veeam software products support HPE Nimble snapshot integration

A. Yes

B. No

Correct Answer: B

**QUESTION 2**

A customer has deployed a hyperconverged environment based on HPE SimpliVity at a number of their

sites.

Before migrating workloads to the environment, you ask them about the backup policies in an HPE

SimpliVity solution to protect the actual data.

Is this a design consideration that you should mention to your customer? Solution:The types of applications running In the resource pools.

A. Yes

B. No

Correct Answer: A

**QUESTION 3**

Your customer deployed Micro Focus Data Protector as the data protection solution for their HPE 3PAR storage infrastructure in combination with HPE StoreOnce appliances.They contact you regarding options to extend data protection towards the cloud Is this a valid option for your customer? Solution Micro Focus Data Protector has no native cloud Integration and is dependent of the backup target appliance to send data towards solutions like HPE StoreOnce Cloud Bank

A. Yes

B. No

Correct Answer: A

**QUESTION 4**

Is this a correct statement about the integration of Veeam with HPE storage arrays and HPE StoreEver tape libraries? Solution:Veeam Integration with HPE 3PAR StoreServ and HPE Nimble Storage allows the backup server to directly communicate with the production storage to request a crash- or application- consistent snapshot, which is performed by the array itself

A. Yes

B. No

Correct Answer: A

**QUESTION 5**

Your customer has deployed two datacenters running a virtualized environment based on HPE Synergy. HPE Nimble storage protected by Veeam. and HPE StoreOnce appliances. They run backup jobs to local NAS-based backup targets al night and run created replication fobs to replicate the backup data afterwards to the backup target In the other site. The customer is concerned about the impact or replication jobs on the network bandwidth between the two sites, and wants your recommendations on how to optimize the replication traffic between the two sites. Is this a valid recommendation? Solution: Deploy additional Veeam Gateway Server functions to allow extension of available bandwidth to the backup targets.

A. Yes

B. No

Correct Answer: B
