QUESTION 1

A customer wants to deploy a multi-tenancy SAP BW platform for its existing customers with the aim to capture new ones. The initial SAP HANA DB deployment is expected to be 4TB in size, but the system must be easy to scale for unpredictable data growth over the next 24 months. High availability and fault tolerance are important features to the customer. Unattended, automated failover should be achieved. Is this a configuration or service that the solution architect should recommend to this customer?

HPE ConvergedSystem for SAP HANA Appliance Healthcheck Service

A. Yes

B. No

Correct Answer: A

QUESTION 2

Is this a building block in HPE Workload and Density Optimized (WDO) Reference Architectures to deploy HADOOP, Spark, and SAP HANA Vora?

HPE Synergy Composable compute and storage nodes.
