QUESTION 1

What is required in order to prevent other hosts from mounting the source volume in the Peer Motion import stage migration workflow even after the migration?

- A. Set an SCSI Buffer Queue Full on each source volume.
- B. Set a longer SCSI time-out value on each source volume.
- C. Set the SCSI time-out value to zero on each source volume.
- D. Place an SCSI-3 reservation on each source volume.

Correct Answer: C

QUESTION 2

Which remote copy mode is supported with RMC-V? (Select three.)

- A. Sync Catalyst Copy
- B. Async Journaling mode
- C. Sync mode
- D. Async Streaming mode
- E. Async Periodic mode

Correct Answer: ACD

QUESTION 3

What happens to the peer volume in a Peer Persistence configuration when a failover happens?

- A. The peer volume in the destination array changes the WWN by adding "10" to the last 2 numbers of the WWN in the primary array.
- B. The peer volume in the destination array adds the destination array serial number in HEX to the WWN from the primary array.
- C. The peer volume WWN in the destination array is randomly generated during failover.
- D. The state of the paths changes from passive/non-optimized to active/optimized.

Correct Answer: B

QUESTION 4

What is the cache operation state for the volumes participating in a unidirectional Peer Motion workflow at the Admit stage?

- A. Persistent Cache enforced on the source array
- B. Mirror Cache on the destination array
- C. cacheless on the source array
- D. cacheless on the destination array

Correct Answer: B

QUESTION 5

What does RMC do to retrieve a data set that is no longer available within the HPE 3PAR snapshot? (Select three.)

- A. It creates a clone R/O snapshot virtual volume using Catalyst Copy from StoreOnce Catalyst Store.
- B. RMC performs a Catalyst Copy over Ethernet via the 3PAR File Persona port from StoreOnce.
- C. RMC performs a block comparison between Express Protect Backups.
- D. RMC performs a Peer Copy from StoreOnce to a child snapshot virtual volume in 3PAR.
- E. The child snapshot is then attached/mounted to a host to recover the files.
- F. It creates a child R/W snapshot on the 3PAR.

Correct Answer: BDE
