QUESTION 1

What is required in order to prevent other hosts from mounting the source volume in the Peer Motion import stage migration workflow even after the migration?

- A. Set an SCSI Buffer Queue Full on each source volume.
- B. Set a longer SCSI time-out value on each source volume.
- C. Set the SCSI time-out value to zero on each source volume.
- D. Place an SCSI-3 reservation on each source volume.

Correct Answer: C

QUESTION 2

Which functions are included with the HPE 3PAR All-inclusive Multi-system license? (Select three.)

- A. Adaptive Sparing
- B. Express Protect
- C. Virtual Domains
- D. Peer Persistence
- E. Federation
- F. Remote Copy

Correct Answer: CDE

QUESTION 3

Which functionalities are supported by the 16Gb FC adapter installed in the HPE 3PAR StoreServ 9450 controller node? (Select three.)

- A. iSCSI Host Connectivity
- B. Remote Copy Connectivity
- C. FC Host Connectivity
- D. Drive Enclosure Connectivity
- E. File Persona Connectivity
- F. Peer Ports Connectivity

Correct Answer: BCE

QUESTION 4

What happens to the peer volume in a Peer Persistence configuration when a failover happens?

- A. The peer volume in the destination array changes the WWN by adding "10" to the last 2 numbers of the WWN in the primary array.
- B. The peer volume in the destination array adds the destination array serial number in HEX to the WWN from the primary array.
- C. The peer volume WWN in the destination array is randomly generated during failover.
- D. The state of the paths changes from passive/non-optimized to active/optimized.

Correct Answer: B

QUESTION 5

What is the benefit of using HPE 3PAR StoreServ and HPE Recovery Manager Central with HPE StoreOnce? (Select two.)

- A. Each backup completes at the speed of a differential backup and restores as a traditional full restore.
- B. The HPE Recovery Manager Central agent in each host provides self-service data protection.
- C. They provide rapid and non-disruptive online recovery.
- D. Each backup is deduplicated in the 3PAR array prior to a restore, for an application-consistent restore result.
- E. Each backup can be restored via a synthetic full image.

Correct Answer: AB
