**QUESTION 1**

A customer has a mixture of Gen8 and newer DL and BL devices. They want to enable support automation and run inventory reports on their devices. They are currently using Insight Control but are considering HPE OneView. They can't have any downtime on the devices if they change management strategies. What option is most efficient for them?

- A. Move to HPE OneView Advanced with Remote Support enabled.
- B. Move to HPE OneView Standard with Remote Support enabled.
- C. Stay on Insight Control and activate a Proactive Care contract.
- D. Stay on Insight Control and enable Insight Online.

Correct Answer: A

QUESTION 2

Which enhanced security feature is unavailable within HPE OneView?

- A. configure firewall rules
- B. role-based access control
- C. two-factor authentication
- D. SNMP v3

Correct Answer: A

QUESTION 3

For multiple events to be identified as an SNMP trap storm, what criteria must the traps meet? (Choose three.)

- A. have the same trap identifier
- B. are within 1 second of the previous event
- C. have the same hostname
- D. are from the same device
- E. originate from the same MAC addresses
- F. have the same number of variable string values

Correct Answer: ABD

QUESTION 4

DRAG DROP

Match the security features of HPE OneView with their use cases.

Select and Place:

Feature	Use Case	
Certificate based trust	Identity validation for management network transactions.	
Role based access control	Secure form of user authentication based on "what you know" and "what you have".	
Scope based access control	Restriction of user rights to a subset of resources within the infrastructure.	
Two-factor authentication	Restriction of user rights to perform actions (create, read, update, delete, or use) to specific resources within a category.	

Correct Answer:

Feature	Use Case	
	Identity validation for management network transactions.	Two-factor authentication
	Secure form of user authentication based on "what you know" and "what you have".	Certificate based trust
	Restriction of user rights to a subset of resources within the infrastructure.	Scope based access control
	Restriction of user rights to perform actions (create, read, update, delete, or use) to specific resources within a category.	Role based access control

QUESTION 5

An administrator is creating a volume template in HPE OneView to manage storage volumes on an HPE 3PAR StoreServ storage system. In addition to the file storage pool and capacity, which parameters in the template must the administrator specify? (Choose two.)

A. provisioning type

- B. drive type
- C. sharing mode
- D. storage type
- E. deduplication method

Correct Answer: AC
