QUESTION 1

How does HPE OneView 4.0 along with HPE ProLiant Gen 10 benefit customers who are concerned about malware attacks?

- A. Continuously scans server firmware for malware code
- B. Forces secure boot for both Legacy and UEFI BIOS mode.
- C. Introduces Trusted Platform Module 2.0 support.
- D. Provides a Secure Boot option setting as part of the server profile.

Correct Answer: B

QUESTION 2

After assigning a server profile to an HPE ProLiant blade, you notice that the serial number being reported on the server profile page is not the one that matches the label on the server. You want the reported serial number to match the label. What do you need to do?

- A. Create a new Server Profile and go to the "Advanced" section, then change the radio button for the serial number/UUID from "Virtual" to "Physical" and apply it to the server.
- B. Edit the Server Profile and go to the "Advanced" section, then change the radio button for serial number/UUID from "Virtual" to "Physical".
- C. Create a new Server Profile Template and go to the "Advanced" section, then change the radio button for the serial number/UUID from "Virtual" to "Physical".
- D. Edit the Server Profile and go to the "Advanced" section, then change the radio button for serial number/ UUID from "Virtual" to "Physical" and enter the serial number.

Correct Answer: D

QUESTION 3

Where would you go in the HPE OneView Main Menu to access information about the environment status that can be exported to csv?

- A. Activity
- B. Dashboard
