QUESTION 1

An SY480 compute module is having issues and needs to have the motherboard replaced in the interest of time, you decide to move the hard drives to a spare compute module. To prevent losing data, what do you need to do before applying the same profile to the new blade?

- A. Check "Re-initialize controller on next profile application" in the "Local Storage" section of the Server Profile.
- B. Check "Import existing logical drives" in the "Local Storage" section of the Server Profile.
- C. Ensure that the RAC level is configured "or RAID1 then select the "Boot" checkbox in the "Local Storage" section of the Server profile.
- D. Select "Create logical drive" in the "Local Storage" section of the Server Profile, then uncheck "Manage integrated storage controller".

Correct Answer: B

QUESTION 2

HOT SPOT

A server administrator needs to expand a VMware vSphere farm and use an already existing server profile as a baseline. Click the area where new server profile templates can be created from a selected server profile.

Hot Area:

The screenshot shows the OneView interface. In the left-hand navigation pane, under 'Server Profiles 5', there is a list of profiles: ESX 3, ESX 4, HYPERV 1, HYPERV 2, and HYPERV FARM_D. The 'ESX 4' profile is selected and highlighted. A green box highlights the '+ Create profile' button next to the ESX 4 profile. The main content area shows the 'General' tab for the ESX 4 profile, with various configuration details like Description, Server profile template, Server hardware, etc.

Correct Answer:

QUESTION 3

DRAG DROP

Match the HPE OneView element to its definition.

Select and Place:

Element	Definition	
HPE OneView dashboard	HPE OneView hardware appliance.	<input type="text"/>
HPE OneView Global Dashboard	HPE OneView components that publish state changes and respond to REST API calls.	<input type="text"/>
HPE OneView OVF	Information aggregation point for multiple HPE OneView environments	<input type="text"/>
HPE OneView resource managers	Customizable graphical representation of the health and capacity of data center resources.	<input type="text"/>
HPE Synergy Composer		

Correct Answer:

Element	Definition	
	HPE OneView hardware appliance.	HPE Synergy Composer
HPE OneView OVF	HPE OneView components that publish state changes and respond to REST API calls.	HPE OneView resource managers
	Information aggregation point for multiple HPE OneView environments.	HPE OneView Global Dashboard
	Customizable graphical representation of the health and capacity of data center resources.	HPE OneView dashboard

QUESTION 4
