#### QUESTION 1

What is the best practice when deploying an HPE OneView appliance?

- A. deploy the appliance in a hypervisor cluster that is not managed by OneView
- B. use thin-provisioning for the HPE OneView appliance to save storage capacity
- C. enable VMware Fault Tolerance if the appliance is deployed to a VMware hypervisor
- D. deploy two HPE OneView appliances and configure them in HA mode

Correct Answer: A

---

#### QUESTION 2

Which statement about managing an HPE BladeSystem server is true?

- A. A multi-enclosure Virtual Connect domain can be imported to HPE OneView without disrupting servers
- B. An HPE server blade can be removed from HPE OneView by deleting the server from the Server Hardware section
- C. An HPE server blade cannot be deleted from HPE OneView. It must be physically removed from the enclosure
- D. Both c3000 and C7000 HPE BladeSystem enclosures can be imported to HPE OneView for monitoring

Correct Answer: B

---

#### QUESTION 3

Which statement regarding HPE OneView backup restore is true?

- A. During backup restore, users with Administrator privileges can still login to HPE OneView
- B. An HPE OneView backup can be used to restore individual components like server profile
- C. Users with Backup Administrator privileges can restore an HPE OneView backup
- D. Only users with Infrastructure Administrator privileges can restore an HPE OneView backup

Correct Answer: D

---

#### QUESTION 4

Your customer wants to optimize Gen10 servers for a virtualization workload by configuring all of them with a specific workload profile in the BIOS. All of the servers are managed using HPE OneView.

How can this task be completed?

- A. Set a specific workload profile within Logical Interconnect Group and update all servers.
- B. Set a specific workload profile for all managed servers as an HPE OneView global setting.
- C. Set a specific workload profile within server profile template and update all profiles.
- D. Set a specific workload profile using iLO interface for each individual server.

Correct Answer: C

---

#### QUESTION 5

What is required to add remote frame link topology to HPE OneView?

- A. The IP address assigned to HPE Composer installed in a remote site must be registered in a primary site
- B. Multi-site licenses must be added to HPE OneView and activate for all available HPE Synergy frames
- C. The HPE OneView certificate from the primary site must be added to HPE OneView in the remote site
- D. Management ports of the remote frame link topology must be connected to the management LAN

Correct Answer: D
